5 Port Solenoid Valve

Rubber Seal

Connector Type Manifold

The EX250/500 series is to be discontinued. When designing new equipment and facilities, consider using another series (EX260/EX600) instead.

Series SV1000/2000/3000/4000

SMC

EUS11-81Aaa-UK

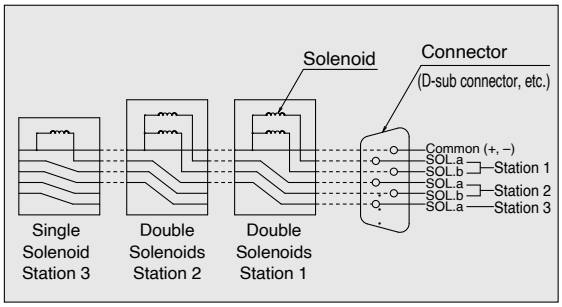

Connector Type Manifold
Series SV1000/2000/3000/4000

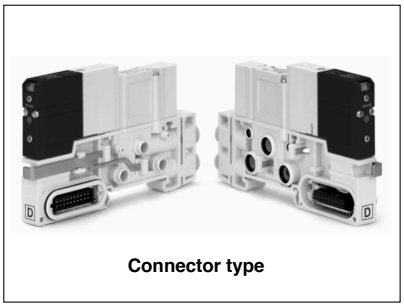

■ The use of multi-pin connectors to replace wiring inside manifold blocks provides flexibility when adding stations or changing manifold configuration.

Series SV employs a multi-connector instead of the conventional lead wires for internal.
By connecting each block with a connector, changes to manifold stations are greatly simplified.

Connector wiring diagram

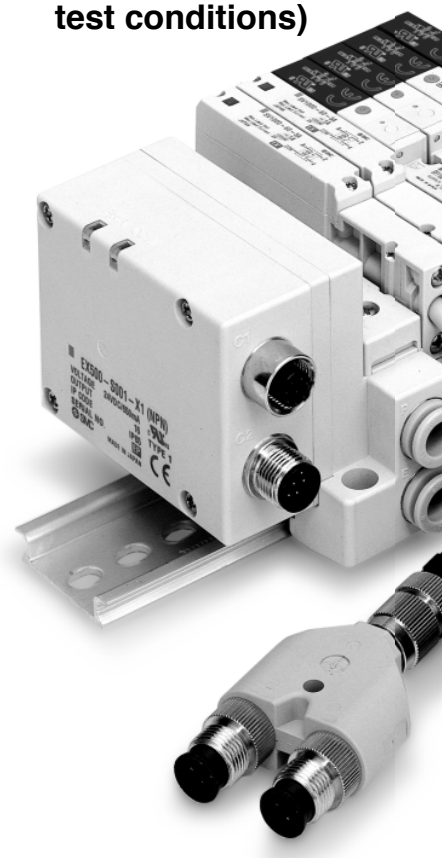

For both serial and parallel wiring, additional manifold blocks are sequentially assigned pins on the connector. This makes it completely unnecessary to disassemble the connector unit.

Connector type

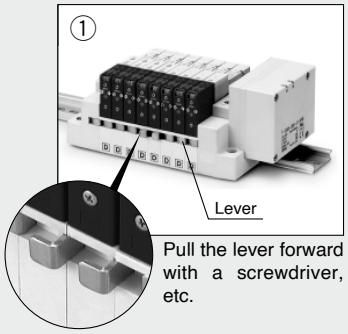

Service life of 50 million cycles or more (Based on SMC life test conditions)

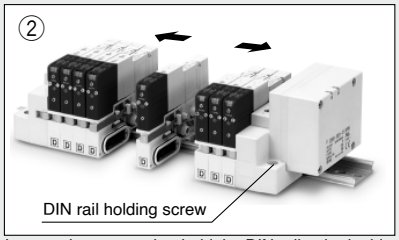

Power consumption: 0.6 W (Current: 25 mA, 24 V DC)

■ Cassette base type manifold (For SV1000/2000)

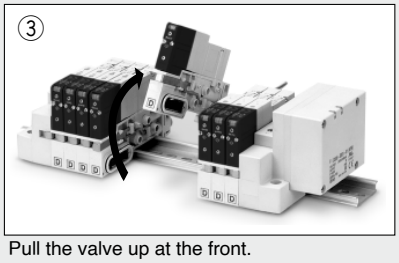

Cassette base type manifolds offer the ultimate in flexibility.
Manifold sections can be added using a simple release mechanism.

Pull the lever forward with a screwdriver, etc.

Loosen the screws that hold the DIN rail at both sides and separate the manifold to the right and left.

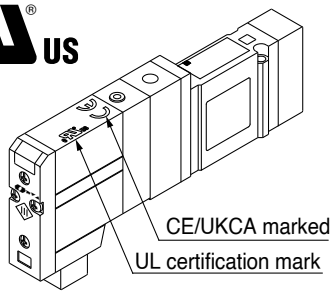

Pull the valve up at the front.

■ Tie-rod base manifold (For SV1000/2000/3000/4000)

Conventional tie-rod base type manifolds are also available.
34 pins connector allows up to 16 stations with double solenoids.

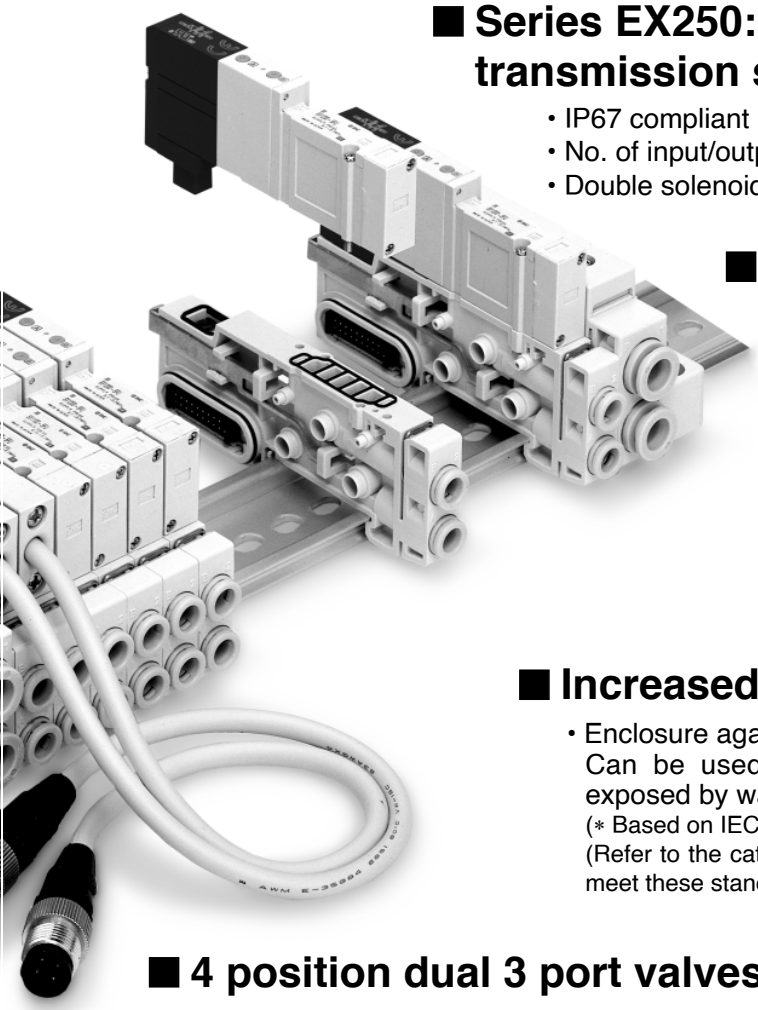

■ A relay output module control of devices up is available for to 110 V AC, 3 A.

■ The standard product is CE/UKCA-compliant and UL-standard.

■ Series EX500: Gateway-type, serial transmission system

- IP67 compliant (Gateway unit and input manifold are compliant with IP65.)
- No. of input/output point: 128 points (Output 64 points, Input 64 points)
- Controls up to 4 branches with 32 I/O per branch
- A single cable from the gateway provides both signal and power for each branch, eliminating the need for separate power connections for each manifold.

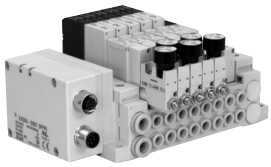

■ Series EX250: Integrated-type (for I/O), serial transmission system

- IP67 compliant (compliant with IP40.)
- No. of input/output point: 64 points (Output 32 points, Input 32 points)
- Double solenoid allows up to 16 stations (up to 32 solenoids).

■ Interface regulator Series SV1000, 2000, 3000, 4000

- P port regulation, A port regulation and B port regulation are selectable, depending on an application.
  Able to set the pressure arbitrarily for each station of the manifold just by inserting between manifold base and valve.

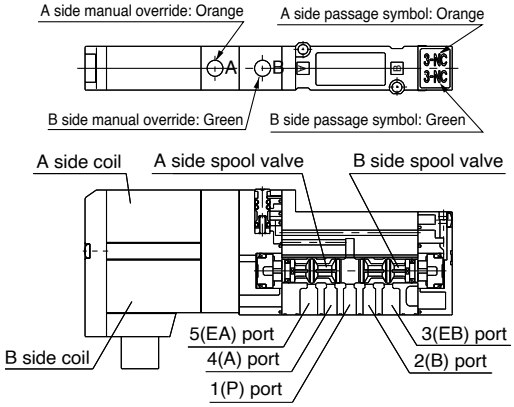

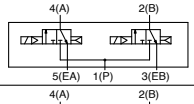

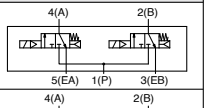

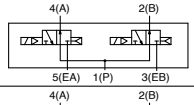

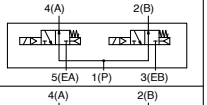

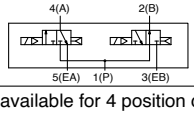

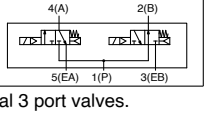

■ Increased moisture and dust resistance.

- Enclosure against foreign matters and water is conforming to IP67 *.
  Can be used in an atmosphere where the valve or manifold is exposed by water, etc. directly.
  (* Based on IEC60529)
  (Refer to the catalogue contents for details, as some types of connectors do not meet these standards.)

■ 4 position dual 3 port valves available for Series SV1000/2000

- Two 3 port valves built into a single valve body.
- A and B ports can be individually controlled.
- Three combinations are available: [N.C./N.C.], [N.O./N.O.], and [N.C./N.O.].
- Mixed mounting with 5 port valves is also possible.
- Labels are attached to indicate A and B side functions, using the same colour as the manual override.

Model	A side	B side	Symbol	
			Series SV1000	Series SV2000
SV1A00	N.C. valve	N.C. valve		
SV1B00	N.O. valve	N.O. valve		
SV1C00	N.C. valve	N.O. valve		

* External pilot specifications is not available for 4 position dual 3 port valves.

INDEX

Series SV Manifold Variations

Serial Wiring

Valve Manifold Common Specifications P. 5

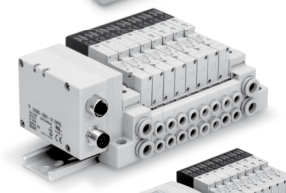

Manifold specifications

EX500 Gateway Decentralised System 2 P. 8

IP67 compliant

Applicable series: **Tie-rod base manifold SV1000/SV2000/SV3000**

• Number of output points: 32 points • Connected to the SI unit of the EX500

EX250 Integrated-type (For I/O) Serial Transmission System P. 16

IP67 (partly IP40) compliant

Applicable series: **Tie-rod base manifold SV1000/SV2000/SV3000**

• Number of input/output points: Each 32 points

EX600 Integrated-type (For I/O) Serial Transmission System P. 22

IP67 compliant

Applicable series: **Tie-rod base manifold SV1000/SV2000/SV3000**

• Digital input/output: Max. 144 inputs/144 outputs
• Analogue input: Max. 18 channels
• Valve output: 32 outputs

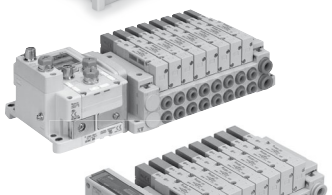

EX260 Integrated-type (For Output) Serial Transmission System P. 32

IP67 (partly IP40) compliant

Applicable series: **Tie-rod base manifold SV1000/SV2000/SV3000**

• Number of output points: 16 points

EX126 Integrated-type (For Output) Serial Transmission System P. 38

IP67compliant

Applicable series: **Tie-rod base manifold SV1000/SV2000/SV3000**

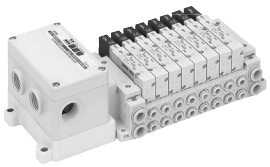

• Number of output points: 16, 32 points

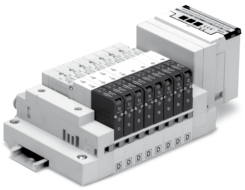

EX120 Integrated-type (For Output) Serial Transmission System P. 44

Applicable series: **Cassette base manifold SV1000/SV2000**

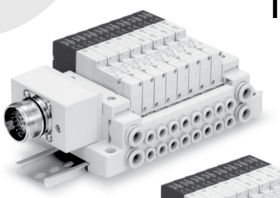

Tie-rod base manifold SV1000/SV2000/SV3000/SV4000

• Number of output points: 16 points

Parallel Wiring

For Circular Connector P. 54

IP67 compliant

Applicable series: **Cassette base manifold SV1000/SV2000**

Tie-rod base manifold SV1000/SV2000/SV3000/SV4000

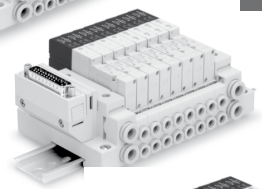

• Number of connectors: 26 pins

D-sub Connector P. 64

Applicable series: **Cassette base manifold SV1000/SV2000**

Tie-rod base manifold SV1000/SV2000/SV3000/SV4000

• Number of connectors: 25 pins
• MIL-C-24308 Conforming to JIS-X-5101

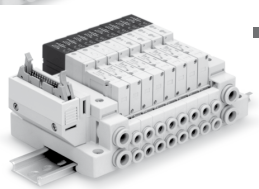

Flat Ribbon Cable Connector P. 74

Applicable series: **Cassette base manifold SV1000/SV2000**

Tie-rod base manifold SV1000/SV2000/SV3000/SV4000

• Number of connectors: 26, 20, 10 pins
• With strain relief Conforming to MIL-C-83503

Manifold Exploded View/Manifold Options P. 85

Single Valve/Sub-plate [IP67 compliant] P. 101

IP67 compliant

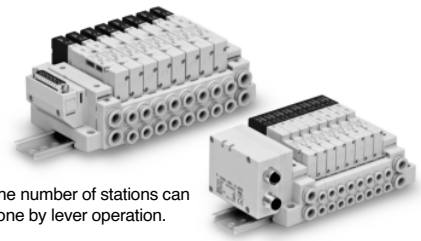

Applicable series: **SV1000/SV2000/SV3000/SV4000**

• With waterproof M12 connector

Made to Order Specifications P. 109

Valve Manifold
Common Specifications
Series SV

Cassette base manifold

• Changing the number of stations can be easily done by lever operation.

Manifold Specifications

Applicable series		SV1000	SV2000
Manifold type		Stacking type cassette base manifold	
1 (P: SUP), 3/5 (E: EXH) type		Common SUP, EXH	
Valve stations (maximum)		18 stations	20 stations
Max. number of solenoids		18 points	26 points
Port size	**1(P), 3/5(E) port**	C8, N9	C10, N11
	4(A), 2(B) port	C3, C4, C6 N1, N3, N7	C4, C6, C8 N3, N7, N9

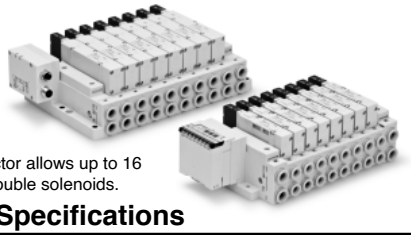

Flow Characteristics

Model	Port size		Flow characteristics							
	1, 5, 3 (P,EA,EB)	4, 2 (A,B)	1→4/2 (P→A/B)				4/2→3/5 (A/B→E)			
			C [dm³/(s·bar)]	b	Cv	Q [l/min (ANR)] Note 2)	C [dm³/(s·bar)]	b	Cv	Q [l/min (ANR)] Note 2)
SS5V1-16	C8	C6	0.89	0.22	0.22	216	0.98	0.21	0.23	236
SS5V2-16	C10	C8	2.3	0.28	0.50	578	2.7	0.18	0.56	640

Note 1) The value is for manifold base with 5 stations and individually operated 2 position type.

Note 2) These values have been calculated according to ISO 6358 and indicate the flow rate under standard conditions with an inlet pressure of 0.6 MPa (relative pressure) and a pressure drop of 0.1 MPa.

Tie-rod base manifold

• 34 pins connector allows up to 16 stations with double solenoids.

Manifold Specifications

Applicable series		SV1000	SV2000	SV3000	SV4000
Manifold type		Tie-rod base manifold			
1 (P: SUP), 3/5 (E: EXH) type		Common SUP, EXH			
Valve stations (maximum)		20 stations			
Max. number of solenoids		32 points			
Port size	**1(P), 3/5(E) port**	C8, N9	C10, N11	C12, N11	C12, N11,03
	4(A), 2(B) port	C3, C4, C6 N1, N3, N7	C4, C6, C8 N3, N7, N9	C6, C8, C10 N7, N9, N11	C8, C10, C12 N9, N11, 02, 03

Flow Characteristics

Model	Port size		Flow characteristics							
	1, 5, 3 (P,EA,EB)	4, 2 (A,B)	1→4/2 (P→A/B)				4/2→3/5 (A/B→E)			
			C [dm³/(s·bar)]	b	Cv	Q [l/min (ANR)] Note 2)	C [dm³/(s·bar)]	b	Cv	Q [l/min (ANR)] Note 2)
SS5V1-10	C8	C6	0.98	0.26	0.24	243	1.1	0.35	0.28	289
SS5V2-10	C10	C8	2.1	0.20	0.46	503	2.4	0.18	0.48	568
SS5V3-10	C12	C10	4.2	0.22	0.91	1018	4.3	0.21	0.93	1036
SS5V4-10	C12	C12	6.2	0.19	1.3	1477	7.0	0.18	1.6	1658

Note 1) The value is for manifold base with 5 stations and individually operated 2 position type.

Note 2) These values have been calculated according to ISO 6358 and indicate the flow rate under standard conditions with an inlet pressure of 0.6 MPa (relative pressure) and a pressure drop of 0.1 MPa.

Enclosure of Manifold Variations (Common for cassette base and tie-rod base)

Series	Enclosure (Based on IEC60529)
EX500 (Gateway Decentralised System 2 (128 points)) Serial Transmission System	IP67 Note 1)
EX600 Serial Transmission System	IP67
EX260 Serial Transmission System	IP67 (partly IP40)
EX126 Serial Transmission System	IP67
EX120 Serial Transmission System	IP20
Circular connector	IP67
D-sub connector	Dusttight (IP40)
Flat ribbon cable	Dusttight (IP40)

Note 1) Enclosure of a gateway unit is IP65.

Series SV Solenoid Valve Specifications

Made to Order Specifications
(For details, refer to page 109.)

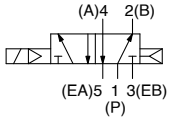

Fluid		Air
Internal pilot Operating pressure range (MPa)	**2 position single 4 position dual 3 port valve**	0.15 to 0.7
	2 position double	0.1 to 0.7
	3 position	0.2 to 0.7
External pilot Operating pressure range (MPa)	**Operating pressure range**	-100 kPa to 0.7
	2 position single, double 3 position	0.25 to 0.7
Ambient and fluid temperature (°C)		-10 to 50 (No freezing)
Max. operating frequency (Hz)	**2 position single, double 4 position dual 3 port valve**	5
	3 position	3
Manual override		Non-locking push type
		Push-turn locking slotted type
Pilot exhaust method	**Internal pilot**	Common exhaust type for main and pilot valve
	External pilot	Pilot valve individual exhaust
Lubrication		Not required
Mounting orientation		Unrestricted
Impact/Vibration resistance (ms²)		150/30
Enclosure		IP67 (Based on IEC60529)
Coil rated voltage		24 V DC, 12 V DC
Allowable voltage fluctuation		±10 % of rated voltage
Power consumption		0.6 (With indicator light: 0.65)
Surge voltage suppressor		Zener diode
Indiator light		LED

Note) Impact resistance: No malfunction occurred when it is tested with a drop tester in the axial direction and at the right angles to the main valve and armature in both energised and de-energised states every once for each condition. (Values at the initial period)
Vibration resisitance: No malfunction occured in a one-sweep test between 45 and 2000 Hz. Test was perfomed at both energised and de-energised states in the axial direction and at the right angles to the main valve and armature. (Values at the initial period)

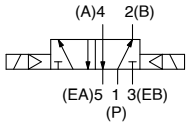

Symbol

4 position dual 3 port valve

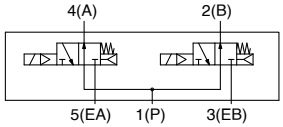

N.C./N.C.

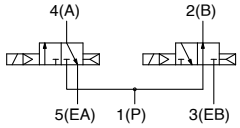

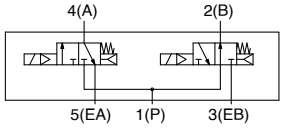

N.O./N.O.

N.C./N.O.

∗ SV3000 and 4000 are not available with 4 position dual 3 port valve.

Response Time

Type of actuation	Response time (ms) (at the pressure of 0.5 MPa)			
	SV1000	**SV2000**	**SV3000**	**SV4000**
2 position single	11 or less	25 or less	28 or less	40 or less
2 position double	10 or less	17 or less	26 or less	40 or less
3 position	18 or less	29 or less	32 or less	82 or less
4 position dual 3 port valve	15 or less	33 or less	—	—

Note) Based on dynamic performance test, JIS B 8375-1981.
(Coil temperature: 20 °C, at rated voltage)

Weight

Series	Type of actuation	Weight (g)
SV1000	Single solenoid	66
	Double solenoid	71
	3 position	73
	4 position dual 3 port	71
SV2000	Single solenoid	74
	Double solenoid	78
	3 position	83
	4 position dual 3 port	78
SV3000	Single solenoid	99
	Double solenoid	102
	3 position	110
SV4000	Single solenoid	186
	Double solenoid	190
	3 position	211

Note) Weight of solenoid valve only.

Gateway-type Serial Transmission System

Series EX500

IP67 compliant

EX500 Gateway Decentralised System 2 P. 9

Applicable series	**Tie-rod base manifold SV1000/SV2000/SV3000**
	• Number of output points: 32 points • Connected to the SI unit of the EX500

EX500 (Gateway Decentralised System 2 (128 Points)) Serial Transmission System

Series SV

The EX250/500 series is to be discontinued. When designing new equipment and facilities, consider using another series (EX260/EX600) instead.

How to Order Manifold

● Tie-rod base

SS5V 1 – W 10 S 1 A3N D – 05 U ☐ – ☐ – ☐

❶ ❷ ❸ ❹ ❺ ❻ ❼

❶ Series

1	SV1000
2	SV2000
3	SV3000

❷ SI unit (Number of outputs, Output polarity, Max. number of valve stations, Protocol)

0	Without SI unit
A3N	32 outputs Note 1) 3), Negative common, 2 to 16 stations (20 stations Note 2)), EtherNet/IP™ , PROFINET

Note 1) 16 outputs can be set by switching the built-in setting switch.
Note 2) ( ): Maximum number of stations for mixed single and double wiring.
Note 3) When using the SI unit with 32 outputs, use the GW unit compatible with the EX500 Gateway Decentralised System 2 (128 points).

❸ Valve stations

	Stations	Note
02	2 stations	Double wiring Note 1)
⋮	⋮	
16	16 stations	
02	2 stations	Specified layout Note 2) (Available up to 32 solenoids)
⋮	⋮	
20	20 stations	

Note 1) Double wiring: single, double, 3-position and 4-position valves can be used on all manifold stations.
Use of a single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
Note 2) Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that double, 3-position and 4-position valves cannot be used where single wiring has been specified.)

SI unit part no.

Symbol	Compatible protocol	SI unit part no.
A3N	EtherNet/IP™	EX500-S103
	PROFINET	

❹ P, E port entry

U	U side (2 to 10 stations)
D	D side (2 to 10 stations)
B	Both sides (2 to 20 stations)

❺ SUP/EXH block assembly

—	Internal pilot
S	Internal pilot, Built-in silencer Note)
R	External pilot
RS	External pilot, Built-in silencer Note)

Note) When the built-in silencer type is used, keep the exhaust port from coming in direct contact with water or other liquids.

❻ A, B port size

Metric size

	A, B port	P, E port	Applicable series
C3	Ø 3.2 One-touch fitting	Ø 8 One-touch fitting	SV1000
C4	Ø 4 One-touch fitting		
C6	Ø 6 One-touch fitting		
C4	Ø 4 One-touch fitting	Ø 10 One-touch fitting	SV2000
C6	Ø 6 One-touch fitting		
C8	Ø 8 One-touch fitting		
C6	Ø 6 One-touch fitting	Ø 12 One-touch fitting	SV3000
C8	Ø 8 One-touch fitting		
C10	Ø 10 One-touch fitting		
M Note)	A, B port mixed		

Inch size

	A, B port	P, E port	Applicable series
N1	Ø 1/8" One-touch fitting	Ø 5/16" One-touch fitting	SV1000
N3	Ø 5/32" One-touch fitting		
N7	Ø 1/4" One-touch fitting		
N3	Ø 5/32" One-touch fitting	Ø 3/8" One-touch fitting	SV2000
N7	Ø 1/4" One-touch fitting		
N9	Ø 5/16" One-touch fitting		
N7	Ø 1/4" One-touch fitting	Ø 3/8" One-touch fitting	SV3000
N9	Ø 5/16" One-touch fitting		
N11	Ø 3/8" One-touch fitting		
M Note)	A, B port mixed		

Note) Indicate the sizes on the manifold specification sheet.
∗ The X and PE port size of external pilot type [R, RS] are 4 (mm) or Ø 5/32" (inch) for the SV1000/2000 series, and Ø 6 (mm) or Ø 1/4" (inch) for the SV3000 series.

❼ Mounting

—	Direct mounting
D	With DIN bracket, DIN rail with standard length
D0	With DIN bracket, without DIN rail
D3 Note)	With DIN bracket, DIN rail for 3 stations
⋮	⋮
D20 Note)	With DIN bracket, DIN rail for 20 stations

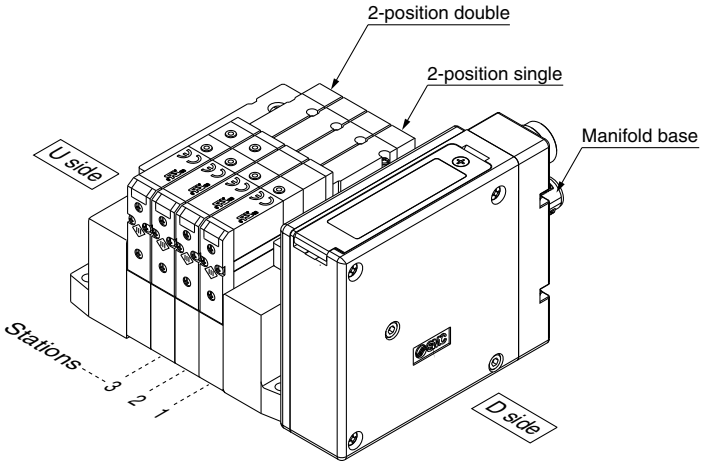

Note) Specify a longer rail than the length of valve stations.
∗ If the DIN rail must be mounted without an SI unit, select "D0" and order the DIN rail separately. Refer to L3 of the dimensions for the DIN rail length. For the DIN rail part number, refer to the **WEB catalogue**.

∗ A separate GW unit and communication cable are required.

For details about the EX500 series, refer to the **WEB catalogue**.

How to Order Manifold Assembly

Example

SS5V1-W10S1A3ND-04B-C6·····1 set (Manifold base part number)
∗ SV1100-5FU·····2 sets (2-position single part number)
∗ SV1200-5FU·····2 sets (2-position double part number)
The asterisk denotes the symbol for assembly.
Prefix it to the part numbers of the valve etc.

- The valve arrangement is numbered as the 1st station from the D side.
- Under the manifold base part number, state the valves to be mounted in order from the 1st station as shown in the figure above. If the arrangement becomes complicated, specify on the manifold specification sheet.

How to Order Valves

SV 1 1 0 0 □ □ – 5 F □ □ – □ – □
A B C D E F G H I

A Series

1	SV1000
2	SV2000
3	SV3000

B Type of actuation

1	2-position single
2	2-position double
3	3-position closed centre
4	3-position exhaust centre
5	3-position pressure centre
A Note)	4-position dual 3-port valve (N.C./N.C.)
B Note)	4-position dual 3-port valve (N.O./N.O.)
C Note)	4-position dual 3-port valve (N.C./N.O.)

Note) Select the SV1000 or SV2000 series for the 4-position dual 3-port valve.
∗ Select the internal pilot type for the 4-position dual 3-port valve.

C Pilot type

—	Internal pilot
R	External pilot

D Back pressure check valve

—	None
K	Built-in

∗ Built-in back pressure check valve type is applicable to the SV1000 series only.
∗ The product with a back pressure check valve is not available for 3-position valves.
∗ Refer to the **WEB catalogue** for built-in back pressure check valve type.

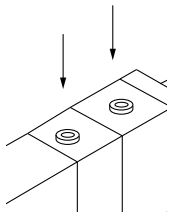

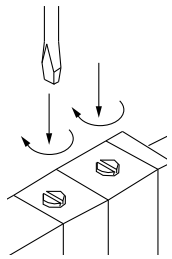

E Rated voltage

5	24 V DC

F Light/surge voltage suppressor

U	With light/surge voltage suppressor
R	Without light, with surge voltage suppressor

G Manual override

—	Non-locking push 
D	Push-turn locking (slotted) 

H Manifold block

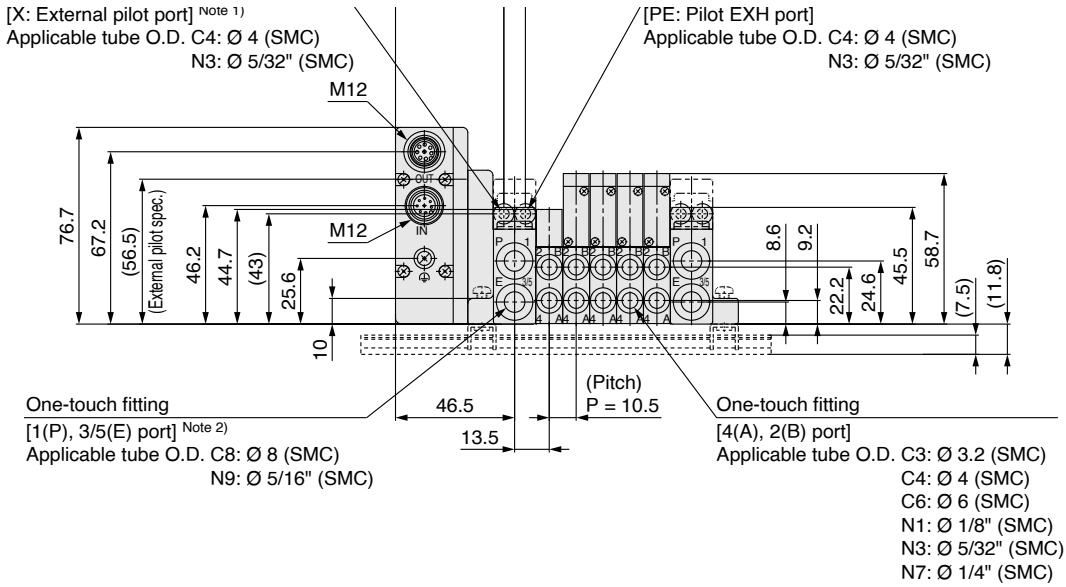

If stations are to be added, order the product with manifold block.
(For details, refer to the **WEB catalogue**.)

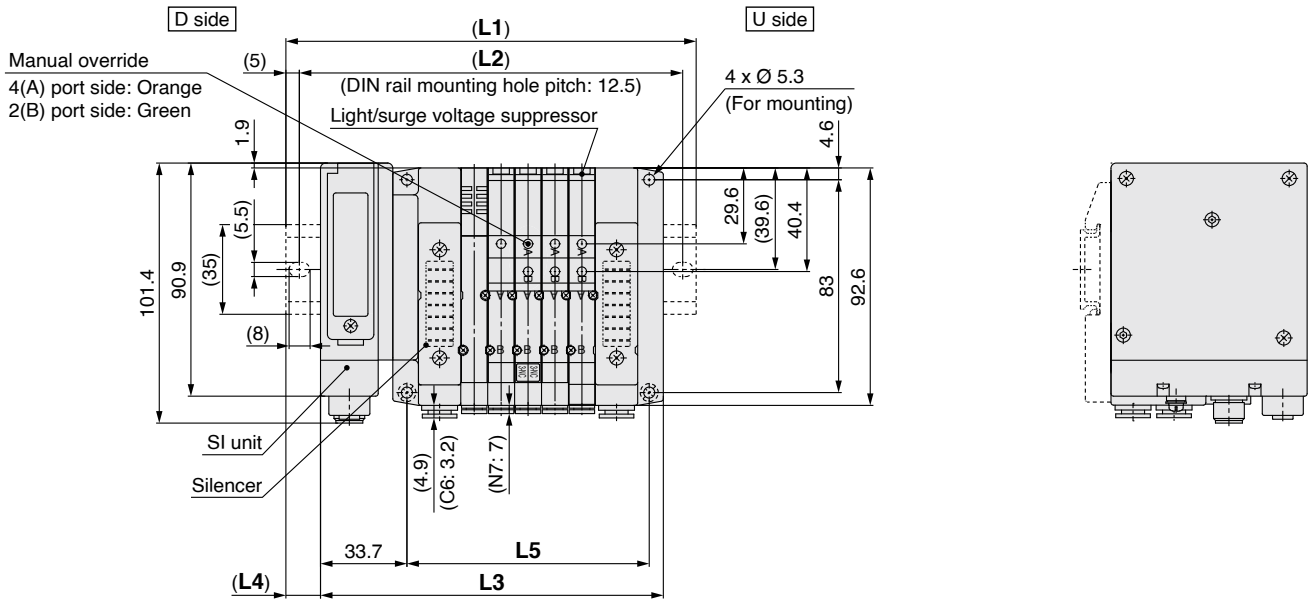

I Made to Order

—	–
X90	Main valve fluororubber specification (For details, refer to the **WEB catalogue**.)

Dimensions: Series SV1000 for EX500 Gateway Decentralised System 2 (128 points)

● Tie-rod base manifold

Note 1) External pilot port positions and silencer discharge port positions are the same as P, E port outlet positions.
Note 2) When P, E port outlets are indicated on the U side or D side, the P, E ports on the opposite side are plugged.

IP67 (partly IP40) compliant

Tie-rod base

Applicable series	**Tie-rod base manifold SV1000/SV2000/SV3000**
• Number of inputs/outputs points: 32 points each	

EX250 Integrated-type (For I/O) Serial Transmission System

Series SV

The EX250/500 series is to be discontinued. When designing new equipment and facilities, consider using another series (EX260/EX600) instead.

How to Order Manifold

● **Tie-rod base**

SS5V 1 – W10S1 QW □ □ □ D – 05 U □ – □ – □

Series

1	SV1000
2	SV2000
3	SV3000

Enclosure
IP67

SI unit

Symbol	Protocol type
0	Without SI unit
QW	DeviceNet®
TAW	AS-Interface (8in/8out 2 power supply systems)
TBW	AS-Interface (4in/4out 2 power supply systems)
TCW (1)	AS-Interface (8in/8out 1 power supply systems)
TDW (1)	AS-Interface (4in/4out 1 power supply systems)
ZEN	EtherNet/IP

•Input blocks cannot be mounted without SI unit.
•When the DIN rail is included without an SI unit, the DIN rail length will accommodate an SI unit and one input block.
Note 1) There is a limit to the supply current to the input block and valve from SI units that have AS-Interface-compliant 1 power supply systems.

Input block stations

—	None
1	1 station
⋮	⋮
8	8 stations

Note) Without SI unit, the symbol is —.
When the SI unit is AS Interface compliant, the maximum number of stations is limited.

Input block type

—	Without input block	
1	M12: 2 inputs	EX250-IE1
2	M12: 4 inputs	EX250-IE2
3	M8: 4 inputs	EX250-IE3

Note) Without SI unit, the symbol is —.

Input block specifications

—	PNP input (+COM) or without input block
N	NPN input (–COM)

Mounting

—	Direct mounting	
D	DIN rail mounting (With DIN rail)	
D0*	DIN rail mounting (Without DIN rail)	
D3	For 3 stations	When a longer DIN rail is desired than the specified stations. (Specify a longer rail than the standard length.)
⋮	⋮	
D20	For 20 stations	

* In the case of D0,only DIN rail fittings are attached.

SUP/EXH block assembly specifications

—	Internal pilot
S*	Internal pilot/Built-in silencer
R	External pilot
RS*	External pilot/Built-in silencer

Note) When the built-in silencer type is used, keep the exhaust port from coming in direct contact with water or other liquids.

P, E port location

U	U side (2 to 10 stations)
D	D side (2 to 10 stations)
B	Both sides (2 to 20 stations)

Valve stations

Symbol	Stations	Note
02	2 stations	Double wiring specifications (1)
⋮	⋮	
16	16 stations	
02	2 stations	Specified layout (up to 32 solenoids possible.) (2)
⋮	⋮	
20	20 stations	

Note 1) Double wiring specifications: Single, double, 3 position and 4 position solenoid valves can be used on all manifold stations. Use of a single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
Note 2) Specified layout: Indicate wiring specifications on the manifold specification sheet. (Note that double, 3 and 4 position valves cannot be used where single solenoid wiring has been specified.)
When the SI unit is AS-Interface compliant, the maximum number of solenoids is as shown below, so please be careful of the number of stations.
• 8in/8out: Max. 8 solenoids
• 4in/4out: Max. 4 solenoids

SI Unit Part No.

Symbol	Protocol type	Solenoid part not.
QW	DeviceNet®	EX250-SDN1
TAW	AS-Interface (8in/8out 2 power supply systems)	EX250-SAS3
TBW	AS-Interface (4in/4out 2 power supply systems)	EX250-SAS5
TCW	AS-Interface (8in/8out 1 power supply systems)	EX250-SAS7
TDW	AS-Interface (4in/4out 1 power supply systems)	EX250-SAS9
ZEN	EtherNet/IP	EX250-SEN1

Manifold
SS5V1-W10S1QW11ND-05B-C6 (1 set)

SS5V1-W10S1QW11ND-05B-C6····1 set (manifold part no.)
∗ SV1100-5FU·····2 sets (Single solenoid part no.)
∗ SV1200-5FU·····3 sets (Double solenoid part no.)

How to Order Valve

SV 1 1 00 □ □ – 5 F □ □ – □ – □ Note)

Note) Available with manifold block for station additions. Refer to page 110.

Series

1	SV1000
2	SV2000
3	SV3000

Made to Order

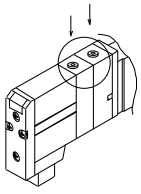

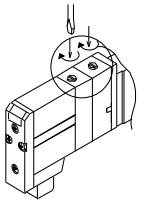

–	–
X90	Main valve fluororubber (Refer to page 109.)

Type of actuation

1	2 position single
2	2 position double
3	3 position closed centre
4	3 position exhaust centre
5	3 position pressure centre
A	4 position dual 3 port valve: N.C./N.C.
B	4 position dual 3 port valve: N.O./N.O.
C	4 position dual 3 port valve: N.C./N.O.

∗ 4 position dual 3 port valves are applicable to Series SV1000 and SV2000 only.

Manual override

–: Non-locking push type	**D**: Push-turn locking slotted type
	

Pilot type

–	Internal pilot
R	External pilot

∗ External pilot specifications is not available for 4 position dual 3 port valves.

Light/Surge voltage suppressor

U	With light/surge voltage suppressor
R	With surge voltage suppressor

Back pressure check valve

–	None
K	Built-in

∗ Built-in back pressure check valve type is applicable to series SV1000 only.
∗ Back pressure check valve is not available for 3 position valve.

Rated voltage

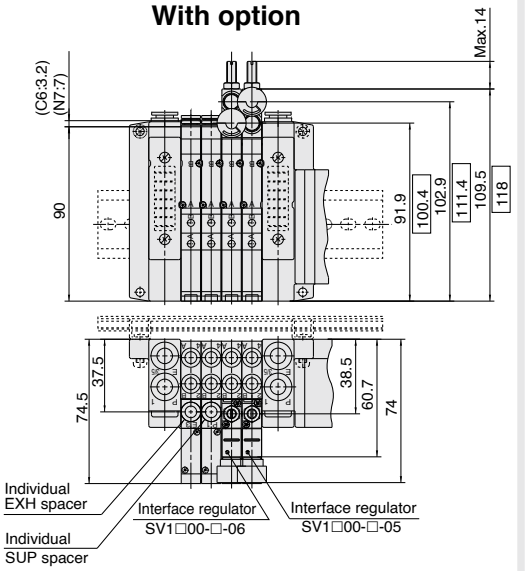

5	24 V DC

Note) Refer to Specific Product Precautions 2 on page 111.

Tie-rod base

Applicable series	**Tie-rod base manifold SV1000/SV2000/SV3000**
	• Digital input/output: Max. 144 inputs/144 outputs • Analogue input: Max. 18 channels • Valve output: 32 outputs

Series EX600

Series SV1000/2000/3000

When I/O Unit EX600-D□□E or EX600-D□□F are selected, enclosure is IP40.
Refer to page 116 for details.

How to Order

● Tie-rod Base

SS5V 1 – □ 10S6 Q □ □ □ D – 05 U □ – C6 – □

Series

1	SV1000
2	SV2000
3	SV3000

Enclosure

—	IP40
W Note)	IP67

Note) When selecting an EX600-D□□E or EX600-D□□F I/O unit, option W (IP67) cannot be selected.

SI Unit

0	Without SI Unit
Q	DeviceNet® type (Version A)
N	PROFIBUS DP type (Version A)
V	CC-Link type
WS	Wireless remote Note 3)

Note 1) I/O units cannot be chosen without SI Unit.
Note 2) When "Without SI Unit" is specified, the valve plate to connect the manifold and SI unit is not mounted. For mounting method, refer to Specific Product Precautions of the **Web Catalogue**.
Note 3) The wireless system is suitable for use only in a country where it is in accordance with the Radio Act and regulations of that country.

End plate type

—	No end plate
2	M12 power supply connector B-coded
3	7/8 inch power supply connector
4	M12 power supply connector IN/OUT, A-coded, Pin arrangement 1
5	M12 power supply connector IN/OUT, A-coded, Pin arrangement 2

Note) Without SI Unit, the symbol is nil.

SI Unit COM.

—	Positive common
N	Negative common

Note) Without SI Unit, the symbol is —.

I/O unit sta. number

—	None
1	1 sta.
⋮	⋮
9	9 sta.

Note 1) Without SI Unit, the symbol is —.
Note 2) SI Unit is not included in I/O unit station number.
Note 3) When I/O unit is selected, it is shipped separately, and assembled by customer.

Valve stations

Symbol	Stations	Note
02	2 sta.	Double wiring specification Note 1)
⋮	⋮	
16	16 sta.	
02	2 sta.	Specified layout Note 2) (Up to 32 solenoids possible)
⋮	⋮	
20	20 sta.	

Note 1) Double wiring specifications: Single, double, 3 position and 4 position solenoid valves can be used at all of the manifold stations.
When single solenoid is used, control signal which is not assigned to any number is made. If empty signal is not wanted, please order with signal layout specified.
Note 2) Specified layout: Indicate wiring specifications with the manifold specification sheet. (Note that double, 3 position and 4 position valves cannot be used where single solenoid wiring has been specified.)

Mounting

—	Direct mounting	
D	DIN rail mounting (With DIN rail)	
D0 Note 1)	DIN rail mounting (Without DIN rail)	
D3	For 3 sta.	When a longer DIN rail is desired than the specified stations. (Specify a longer rail than the standard length.)
⋮	⋮	
D20	For 20 sta.	

Note 1) In the case of D0, only DIN rail mounting bracket is attached.
Note 2) DIN rail is not attached (but shipped together) on the manifold in the case of with DIN rail.
Note 3) When DIN rail mounting (with DIN rail) is selected for the SV3000 series, and I/O unit station number is 9, and max. valve station number is 18. DIN rail mounting (with DIN rail) cannot be specified for 19 and 20 stations. (Refer to the DIN rail total length on pages 25 and 26.)
Note 4) Without SI unit (S60), DIN rail (D) is not available.

SUP/EXH block assembly

—	Internal pilot
S Note)	Internal pilot, Built-in silencer
R	External pilot
RS Note)	External pilot, Built-in silencer

Note) When the built-in silencer type is used, keep the exhaust port from coming in direct contact with water or other liquids.

N7	Ø 1/4" One-touch fitting		
N9	Ø 5/16" One-touch fitting		
N7	Ø 1/4" One-touch fitting	Ø 3/8" One-touch fitting	SV3000
N9	Ø 5/16" One-touch fitting		
N11	Ø 3/8" One-touch fitting		
M	A, B port mixed		

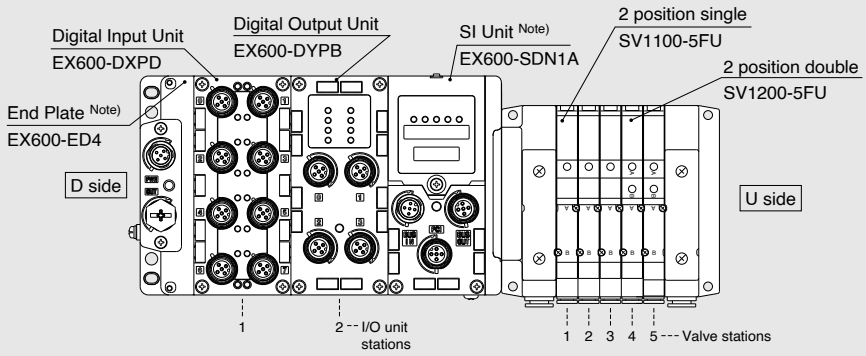

∗ In the case of Mixed specifications (M), indicate separately with the manifold specification sheet.
∗ Regarding the X and PE port size of External pilot type (R), and X port size of External pilot/Built-in silencer type (RS), Ø 4 (mm) and Ø 5/32" (inch) for the SV1000/2000 series, Ø 6 (mm) and, Ø 1/4" (inch) for the SV3000 series.

How to Order Manifold Assembly (Example)

Example (SS5V1)

Manifold
Power supply with
M12 connector

- Digital Input Unit
- Digital Output Unit
- Digital Input/Output Unit
- Analogue Input Unit
- Analogue Output Unit
- Analogue Input/Output Unit

Serial transmission kit

SS5V1-W10S6Q4N2D-05B-C6 ···· **1 set**	**Manifold base part number**	
∗ **SV1100-5FU** ····· **3 sets**	**Valve part number (Stations 1 to 3)**	Enter in order starting from the first station on the D side. When entry of part numbers becomes complicated, indicate with the manifold specification sheet.
∗ **SV1200-5FU** ····· **2 sets**	**Valve part number (Stations 4 to 5)**	
∗ **EX600-DXPD** ····· **1 set**	**I/O unit part number (Station 1)**	Enter in order starting from the first station on the D side. When entry of part numbers becomes complicated, indicate with the manifold specification sheet.
∗ **EX600-DYPB** ····· **1 set**	**I/O unit part number (Station 2)**	

The asterisk denotes the symbol for assembly.
Prefix it to the part nos. of the solenoid valve, etc.

Note) Do not enter the SI Unit part number and the End Plate part number together.

How to Order Valves

SV 1 1 00 – 5 F U –

Series

1	SV1000
2	SV2000
3	SV3000

Type of actuation

1	2 position single solenoid
2	2 position double solenoid
3	3 position closed centre
4	3 position exhaust centre
5	3 position pressure centre
A	4 position dual 3 port valve: N.C./N.C.
B	4 position dual 3 port valve: N.O./N.O.
C	4 position dual 3 port valve: N.C./N.O.

∗ 4 position dual 3 port valves are applicable to the SV1000/2000 series only.

Pilot specifications

–	Internal pilot
R	External pilot

∗ External pilot specification is not available for 4 position dual 3 port valves.

Back pressure check valve

–	None
K	Built-in

∗ Built-in back pressure check valve type is applicable to the SV1000 series only.
∗ The 3 position valve is not available with the back pressure check valve.

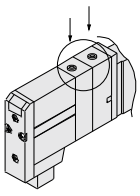

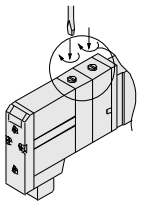

Coil voltage

5	24 V DC

Light/Surge voltage suppressor

U	With light/surge voltage suppressor
R	With surge voltage suppressor

Manual override

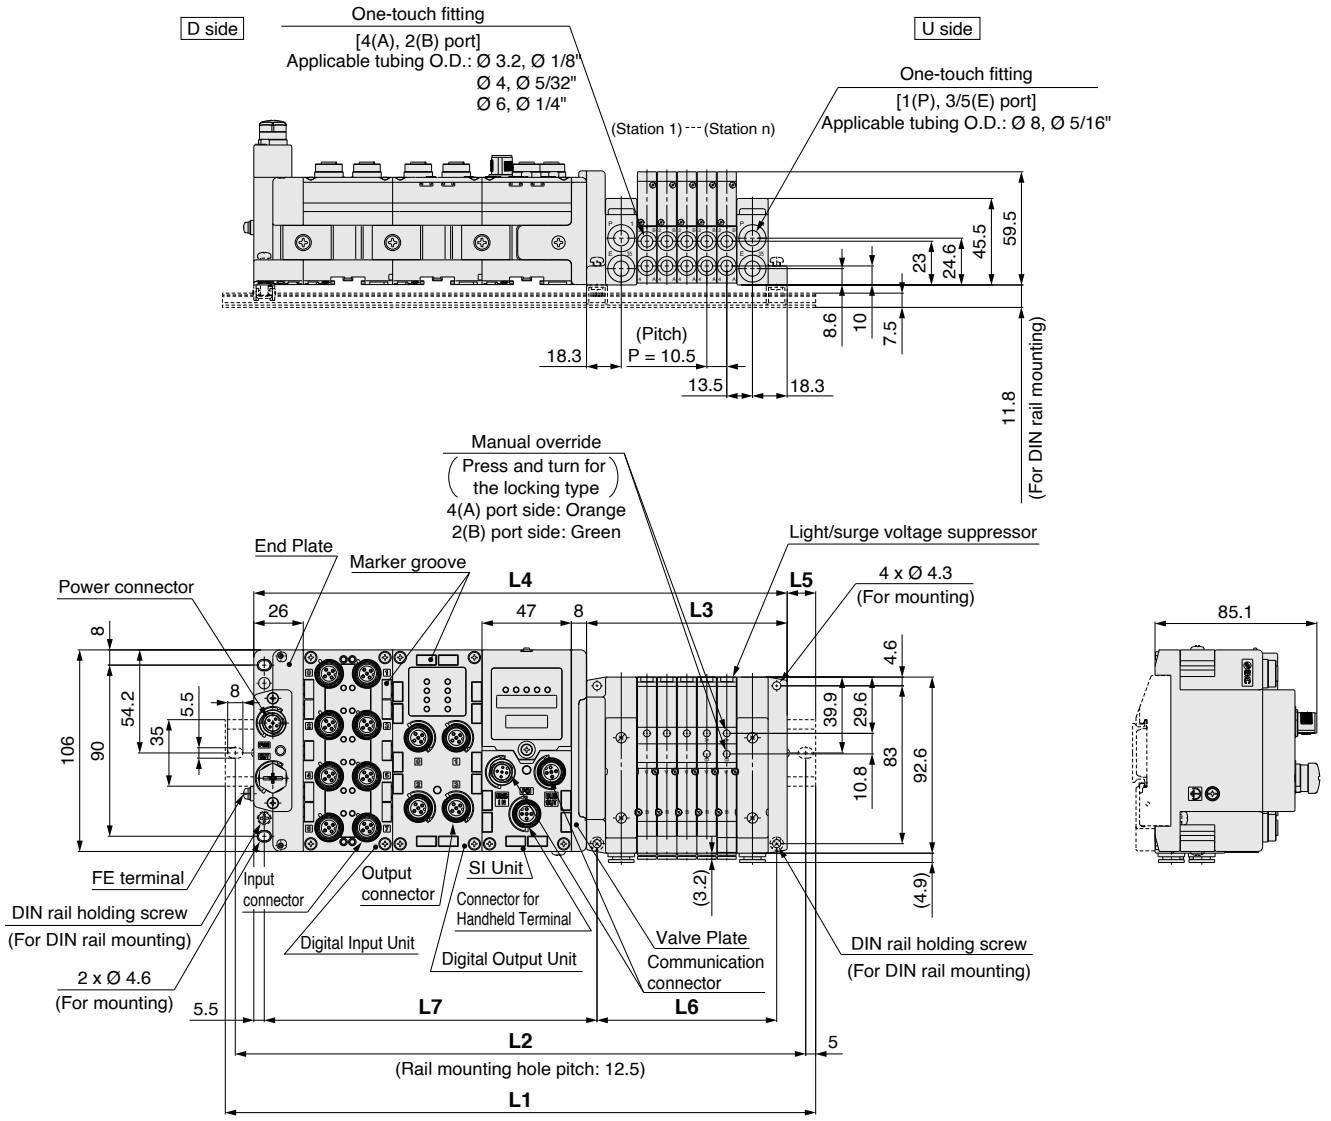

–: Non-locking push type	**D**: Push-turn locking slotted type
	

Made to Order

–	–
X90	Fluororubber specification

Dimensions: Series SV1000

Power supply with M12 connector

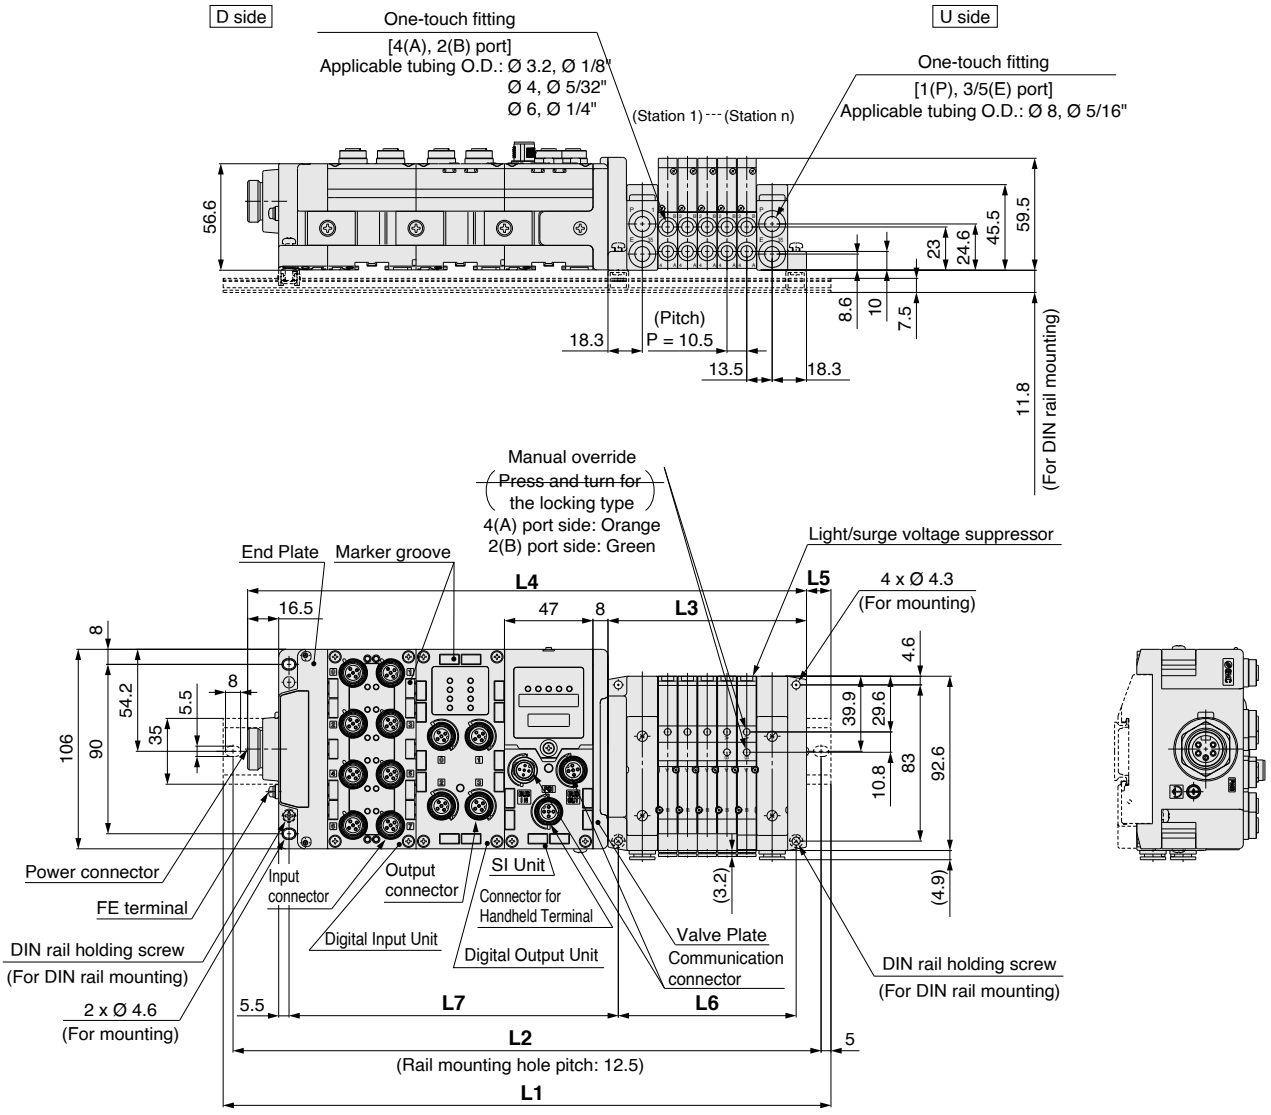

L2 = L1 – 10.5
L3 = 10.5 x n1 + 53
L4 = L3 + 81 + 47 x n2
L5 = (L1 – L4)/2
L6 = 10.5 x n1 + 42
L7 = 47 x n2 + 81

❶ ❷ ❸ ❹ ❺ ❻ ❼

• **Enclosure IP67**

∗ Refer to Note 3) of the ❷ SI unit specifications.

❶ Series

1	SV1000
2	SV2000
3	SV3000

❷ SI unit specifications

(output polarity, protocol, number of outputs, communication connector)

Symbol (output polarity)		Protocol	Number of outputs	Communication connector
Positive common (NPN)	Negative common (PNP)			
0		Without SI unit		
QA	**QAN**	DeviceNet®	32	M12
QB	**QBN**		16	
NA	**NAN**	PROFIBUS DP	32	M12
NB	**NBN**		16	
NC	**NCN**		32	Note 3) D-sub
ND	**NDN**		16	
VA	**VAN**	CC-Link	32	M12
VB	**VBN**		16	
DA	**DAN**	EtherCAT	32	M12
DB	**DBN**		16	
FA	**FAN**	PROFINET	32	M12
FB	**FBN**		16	
EA	**EAN**	EtherNet/IP™	32	M12
EB	**EBN**		16	
— Note 2)	**GAN**	POWERLINK	32	M12
— Note 2)	**GBN**		16	

Note 1) DIN rail cannot be mounted without SI Unit.
Note 2) Positive common (NPN) type is not applicable.
Note 3) IP40 for the D-sub applicable communication connector specification.
(The manifold part number is "SS5V□-10S1NC/ND□D".)
Note 4) For SI unit part number, refer to the table below.

❸ Valve stations

In case of the 32 Outputs SI unit

Symbol	Stations	Note
02	2 stations	Double wiring Note 1)
⋮	⋮	
16	16 stations	
02	2 stations	Specified layout Note 2) (Available up to 32 solenoids)
⋮	⋮	
20	20 stations	

In case of the 16 Outputs SI unit

Symbol	Stations	Note
02	2 stations	Double wiring Note 1)
⋮	⋮	
08	8 stations	
02	2 stations	Specified layout Note 2) (Available up to 16 solenoids)
⋮	⋮	
16	16 stations	

Note 1) Double wiring: single, double, 3-position and 4-position solenoid valves can be used on all manifold stations.
Use of a single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
Note 2) Specified layout: Indicate the wiring specifications with the manifold specification sheet.
(Note that double, 3-position and 4-position valves cannot be used where single solenoid wiring has been specified.)

❹ P, E port location

U	U side (2 to 10 stations)
D	D side (2 to 10 stations)
B	Both sides (2 to 20 stations)

❺ SUP/EXH block assembly specifications

—	Internal pilot
S Note)	Internal pilot/Built-in silencer
R	External pilot
RS Note)	External pilot/Built-in silencer

Note) When the built-in silencer type is used, keep the air outlet from coming in direct contact with water or other liquids.

❼ Mounting

—	Direct mounting	
D	DIN rail mounting (With DIN rail)	
D0	DIN rail mounting (Without DIN rail)	
D3	For 3 stations	When a longer DIN rail is desired than the specified stations. (Specify a longer rail than the standard length.)
⋮	⋮	
D20	For 20 stations	

∗ If the DIN rail must be mounted without an SI Unit, select "D0" and order the DIN rail separately. Refer to L3 of the dimensions for the DIN rail length. For the DIN rail part number, refer to the **WEB catalogue**.

❻ A, B port size (Metric size)

Symbol	A, B port	P, E port	Applicable series
C3	Ø 3.2 One-touch fitting	Ø 8 One-touch fitting	SV1000
C4	Ø 4 One-touch fitting		
C6	Ø 6 One-touch fitting		
C4	Ø 4 One-touch fitting	Ø 10 One-touch fitting	SV2000
C6	Ø 6 One-touch fitting		
C8	Ø 8 One-touch fitting		
C6	Ø 6 One-touch fitting	Ø 12 One-touch fitting	SV3000
C8	Ø 8 One-touch fitting		
C10	Ø 10 One-touch fitting		
M	A, B ports mixed		

A, B port size (Inch size)

Symbol	A, B port	P, E port	Applicable series
N1	Ø 1/8" One-touch fitting	Ø 5/16" One-touch fitting	SV1000
N3	Ø 5/32" One-touch fitting		
N7	Ø 1/4" One-touch fitting		
N3	Ø 5/32" One-touch fitting	Ø 3/8" One-touch fitting	SV2000
N7	Ø 1/4" One-touch fitting		
N9	Ø 5/16" One-touch fitting		
N7	Ø 1/4" One-touch fitting	Ø 3/8" One-touch fitting	SV3000
N9	Ø 5/16" One-touch fitting		
N11	Ø 3/8" One-touch fitting		
M	A, B ports mixed		

∗ In the case of mixed specifications (M), indicate separately on the manifold specification sheet.
∗ The port sizes of X, PE ports for external pilot specifications (R, Rs) are Ø 4 (millimeters) or Ø 5/32" (inches) for the Series SV1000/2000, and Ø 6 (millimeters) or Ø 1/4" (inches) for the Series SV3000.

How to Order Manifold Assembly

Example (SV1000)

Manifold
SS5V1-W10S1NAND-04B-C6 (1 set)

SS5V1-W10S1NAND-04B-C6 ····· 1 set (Manifold part no.)
∗SV1100-5FU ····· 2 sets (Single solenoid part no.)
∗SV1200-5FU ····· 2 sets (Double solenoid part no.)

How to Order Valves

SV 1 1 0 0 ☐ ☐ – 5 F ☐ ☐ – ☐ – ☐
Note)
❶ ❷ ❸ ❹ ❺ ❻ ❼ ❽

❶ Series

1	SV1000
2	SV2000
3	SV3000

❷ Type of actuation

1	2-position single
2	2-position double
3	3-position closed centre
4	3-position exhaust centre
5	3-position pressure centre
A	4-position dual 3-port valve: N.C./N.C.
B	4-position dual 3-port valve: N.O./N.O.
C	4-position dual 3-port valve: N.C./N.O.

∗ 4-position dual 3-port valves are applicable to the Series SV1000 and SV2000 only.

❸ Pilot type

–	Internal pilot
R	External pilot

∗ External pilot specifications is not available for 4-position dual 3-port valves.

❹ Back pressure check valve

–	None
K	Built-in

∗ Built-in back pressure check valve type is applicable to the Series SV1000 only.
∗ Back pressure check valve is not available for 3-position valve.
Note) Refer to Specific Product Precautions 2 on page 111.

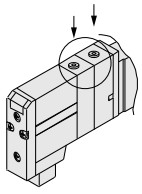

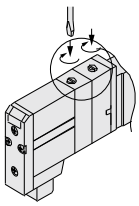

❺ Rated voltage

5	24 V DC

❻ Light/Surge voltage suppressor

U	With light/surge voltage suppressor
R	With surge voltage suppressor

❼ Manual override

–: Non-locking push type	**D**: Push-turn locking slotted type
	

Note) Available with manifold block for station additions. Refer to page 94.

❽ Made to Order

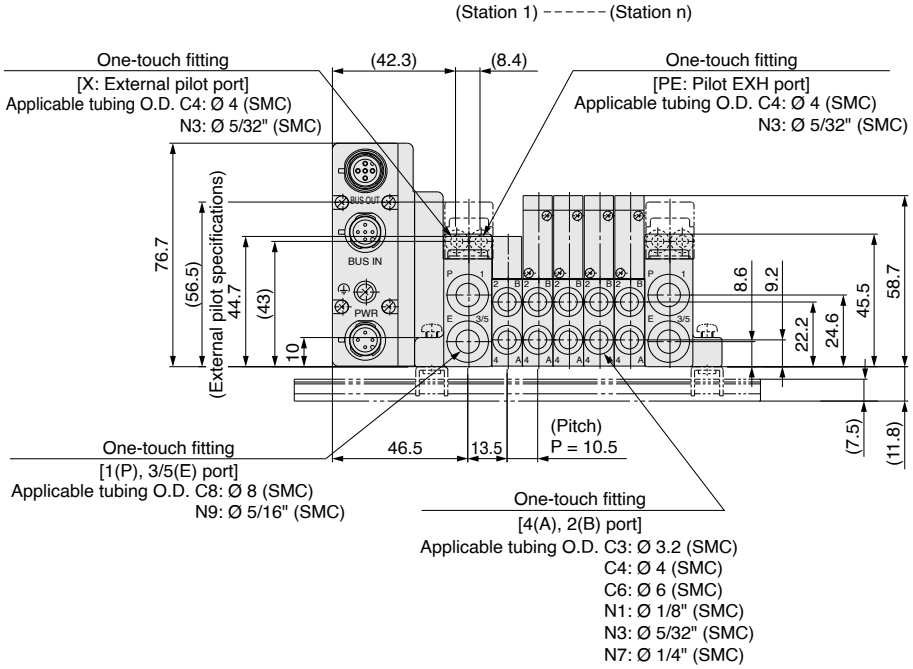

–	–
X90	Main valve fluororubber (Refer to page 109.)

• Refer to the technical operation manual for details of SI unit.

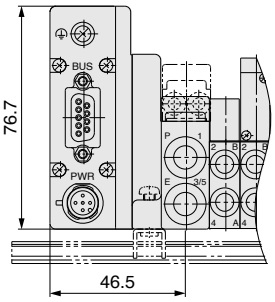

Dimensions: Series SV1000 for EX260 Integrated-type (For Output) Serial Transmission System

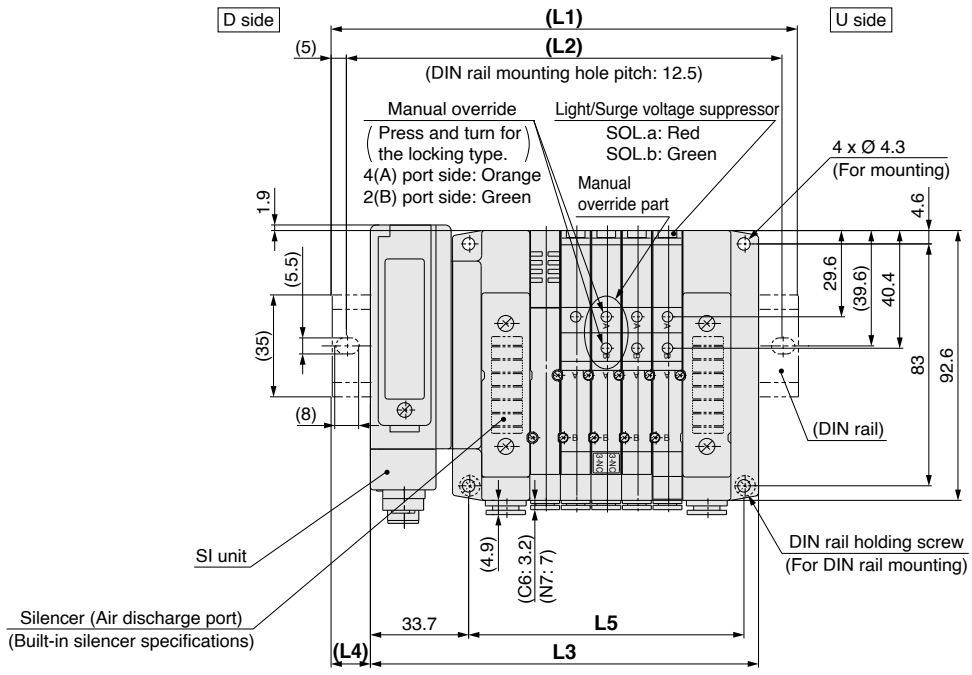

● Tie-rod base manifold: SS5V1-W10S1□□D-[Stations] U/D/B (S, R, RS)- C3, N1 / C4, N3 / C6, N7 (-D)

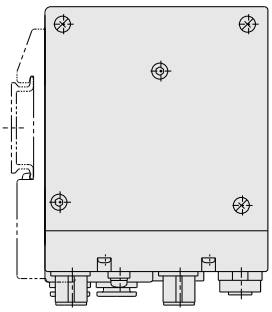

- When P, E port outlets are indicated on the U side or D side, the P, E ports on the opposite side are plugged.
- External pilot port positions and silencer discharge port positions are the same as P, E port outlet positions.

Integrated-type (For Output) Serial Transmission System

Series EX126

IP67 compliant

Applicable series	**Tie-rod base manifold** **SV1000/SV2000/SV3000**
	• Number of outputs points: 16 points

EX126 Integrated-type (For Output) Serial Transmission System

Series SV

How to Order

● Tie-rod base

SS5V 1 – W 10S4 ☐ D – 05 U ☐ – ☐ – ☐

Series

1	SV1000
2	SV2000
3	SV3000

Enclosure
IP67 specifications

SI unit

0	Without SI unit and end plate
VW	CC-Link

• When the SI unit is not included, only the terminal block plate is included.

Valve stations

Symbol	Stations	Note
02	2 stations	(1) Double wiring specifications
⋮	⋮	
08	8 stations	
02	2 stations	(2) Specified layout (up to 16 solenoids possible.)
⋮	⋮	
16	16 stations	

Note 1) Double wiring specifications: Single, double, 3 position and 4 position solenoid valves can be used on all manifold stations. Use of a single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.

Note 2) Specified layout: Indicate wiring specifications on a manifold specification sheet. (Note that double, 3 and 4 position valves cannot be used where single solenoid wiring has been specified.)

Mounting

–	Direct mounting	
D	DIN rail mounting (With DIN rail)	
D0*	DIN rail mounting (Without DIN rail)	
D3	For 3 stations	When a longer DIN rail is desired than the specified stations. (Specify a longer rail than the standard length.)
⋮	⋮	
D16	For 16 stations	

* In the case of D0, only DIN rail fittings are attached.

SUP/EXH block assembly specifications

–	Internal pilot
S*	Internal pilot/Built-in silencer
R	External pilot
RS*	External pilot/Built-in silencer

Note) When the built-in silencer type is used, keep the exhaust port from coming in direct contact with water or other liquids.

P, E port location

U	U side (2 to 10 stations)
D	D side (2 to 10 stations)
B	Both sides (2 to 16 stations)

SI Unit Part No.

Symbol	Protocol type	SI unit part no.
VW	CC-Link	EX126D-SMJ1

Refer to the Operation Manual for the details of the EX126 Integrated-type (For Output) Serial Transmission System. Please download the Operation Manual via our website, http://www.smc.eu.

A, B port size (Metric)

Symbol	A, B port	P, E port	Applicable series
C3	One-touch fitting for Ø 3.2	One-touch fitting for Ø 8	SV1000
C4	One-touch fitting for Ø 4		
C6	One-touch fitting for Ø 6

Integrated-type (For Output) Serial Transmission System

Series EX120

Tie-rod base

Cassette base

Applicable series	**Cassette base manifold SV1000/SV2000**
	Tie-rod base manifold SV1000/SV2000/SV3000/SV4000
	• Number of outputs points: 16 points

EX120 Integrated-type (For Output) Serial Transmission System

Series SV

How to Order Manifold

Mounting

—	Direct mounting	
D	DIN rail mounting (With DIN rail)	
D0*	DIN rail mounting (Without DIN rail)	
D3	For 3 stations	When a longer DIN rail is desired than the specified stations. (Specify a longer rail than the standard length.)
⋮	⋮	
D16	For 16 stations	

∗ In the case of D0, only DIN rail fittings are attached.

Series

1	SV1000
2	SV2000
3	SV3000
4	SV4000

● **Tie-rod base**

SS5V 1 – 10S3 V D – 05 U □ – □ – □

● **Cassette base**

SS5V 1 – 16S3 V D – 05 U □ – □ – □

Series

1	SV1000
2	SV2000

DIN rail length specified

—	Standard length	
3	For 3 stations	(Specify a longer rail than the standard length.)
⋮	⋮	
16	For 16 stations	

SI Unit

Symbol	Specifications
0	Without SI unit
Q	DeviceNet®
V	CC-LINK
ZB Note)	CompoNet® (Positive common)
ZBN Note)	CompoNet® (Negative common)

Note) Communication connector (for the opposite side) is not provided, order it separately.

Valve stations

Symbol	Stations	Note
02	2 stations	(1) Double wiring specifications
⋮	⋮	
08	8 stations	
02	2 stations	(2) Specified layout (up to 16 solenoids possible.)
⋮	⋮	
16	16 stations	

• This also includes the number of blanking plate assemblies.

Note 1) Double wiring specifications: Single, double, 3 position and 4 position solenoid valves can be used on all manifold stations. Use of a single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.

Note 2) Specified layout: Indicate wiring specifications on a manifold specification sheet. (Note that double, 3 and 4 position valves cannot be used where single solenoid wiring has been specified.)

SUP/EXH block assembly specifications

—	Internal pilot
S	Internal pilot/Built-in silencer
R	External pilot
RS	External pilot/Built-in silencer

P, E port location

U	U side (2 to 10 stations)
D	D side (2 to 10 stations)
B	Both sides (2 to 16 stations)

SI Unit Part No.

Symbol	Protocol type	SI unit part no.
Q	DeviceNet®	EX120-SDN1
V	CC-LINK	EX120-SCS1
ZB	CompoNet® (Positive common)	EX120-SCS2
ZBN	CompoNet® (Negative common)	EX120-SMJ1

A	4 position dual 3 port valve: N.C./N.C.
B	4 position dual 3 port valve: N.O./N.O.
C	4 position dual 3 port valve: N.C./N.O.

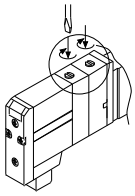

∗4 position dual 3 port valves are applicable to Series SV1000 and SV2000 only.

Manual override

—: Non-locking push type

D: Push-turn locking slotted type

Pilot type

—	Internal pilot
R	External pilot

∗ External pilot specifications is not available for 4 position dual 3 port valves.

Light/Surge voltage suppressor

U	With light/surge voltage suppressor
R	With surge voltage suppressor

Back pressure check valve

—	None
K	Built-in

∗ Built-in back pressure check valve type is applicable to series SV1000 only.
∗ Back pressure check valve is not available for 3 position valve.

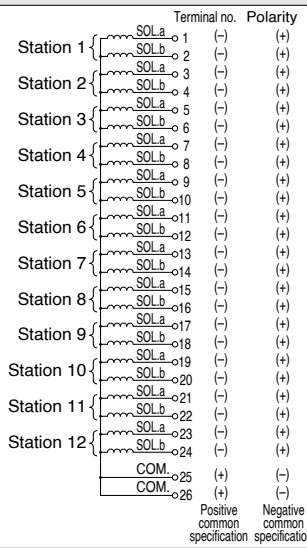

Rated voltage

5	24 V DC
6	12 V DC

Note) Refer to Specific Product Precautions 2 on page 111.

Manifold Electrical Wiring

10C/16C Circular Connector Type (26 pins)

- This circuit has double wiring specifications for up to 12 stations. Since the usable number of solenoids differs depending on the manifold type, refer to the table below. In the case of single solenoids, connect to SOL. A. Furthermore, when wiring is specified on a manifold specification sheet, connections are made without skipping any connectors, and connections are made without skipping any connectors, and signals A for single and A, B for double are in order 1→2→3→4, etc.
- Stations are counted from D side (connector side) as the 1st.
- Since solenoid valves do not have polarity, either the +COM or –COM can be used.

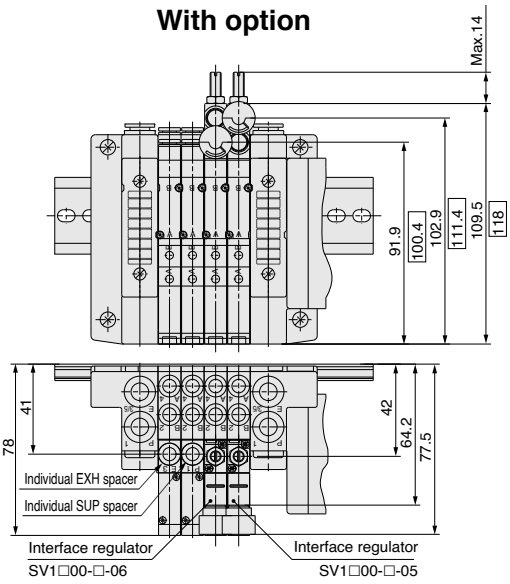

Usable No. of Solenoids

Model		Max. no. of solenoids
Tie-rod base type 10	SV1000 to SV4000	24
Cassette base type 16	SV1000	18
	SV2000	24

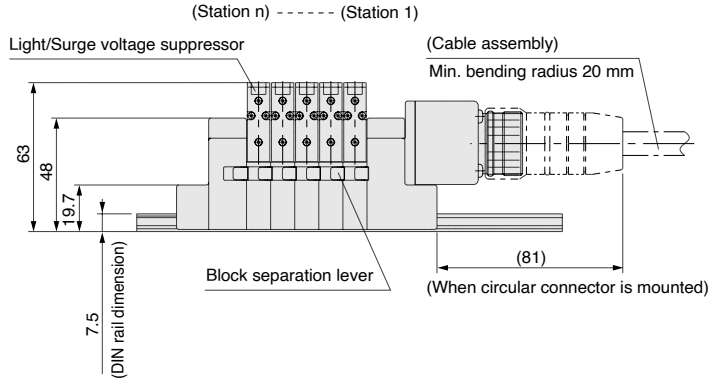

Dimensions: Series SV1000 for Circular Connector

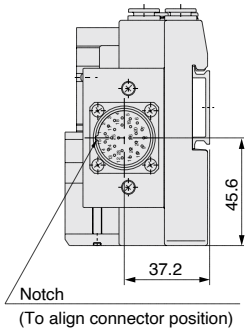

● Cassette base manifold: SS5V1-W16CD-Stations U D B (S, R, RS)- C3, N1 C4, N3 C6, N7

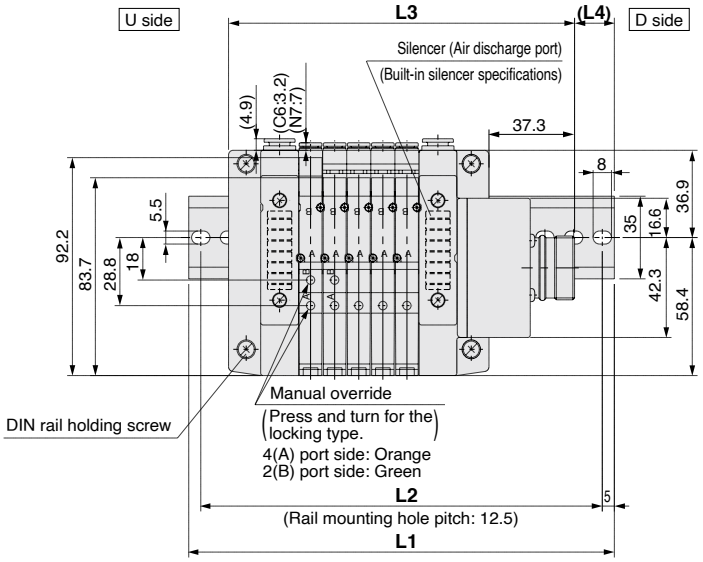

With option

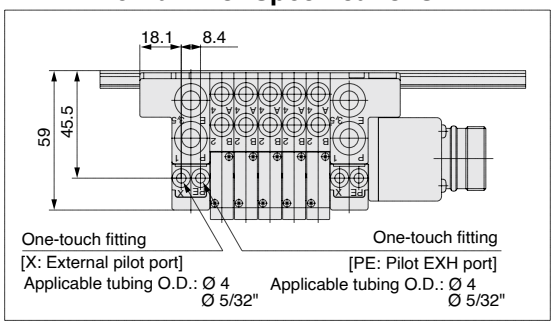

- When P, E port outlets are indicated on the U side or D side, the P, E ports on the opposite side are plugged.
- External pilot port positions and silencer discharge port positions are the same as P, E port outlet positions.

Series SV

How to Order Manifold

Note 1) Double wiring specifications: Single, double, 3 position and 4 position solenoid valves can be used at all of the manifold stations. Use of a single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
Note 2) Specified layout: Indicate wiring specifications on the manifold specification sheet. (Note that double, 3 and 4 position valves cannot be used where single solenoid wiring has been specified.)

Valve stations

Symbol	Stations	Note

How to Order Solenoid Valves

SV 1 1 00 □ □ – 5 F □ □ – □ – □ Note)

Note) Available with manifold block for station additions. Refer to pages 88 and 94.

Series

1	SV1000
2	SV2000
3	SV3000
4	SV4000

Made to Order

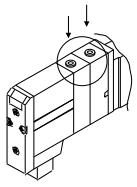

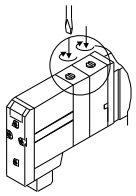

—	—
X90	Main valve fluororubber (Refer to page 109.)

Type of actuation

1	2 position single
2	2 position double
3	3 position closed centre
4	3 position exhaust centre
5	3 position pressure centre
A	4 position dual 3 port valve: N.C./N.C.
B	4 position dual 3 port valve: N.O./N.O.
C	4 position dual 3 port valve: N.C./N.O.

∗ 4 position dual 3 port valves are applicable to Series SV1000 and SV2000 only.

Manual override

—: Non-locking push type	**D**: Push-turn locking slotted type
	

Pilot type

—	Internal pilot
R	External pilot

∗ External pilot specifications is not available for 4 position dual 3 port valves.

Light/Surge voltage suppressor

U	With light/surge voltage suppressor
R	With surge voltage suppressor

Rated voltage

5	24 V DC
6	12 V DC

Back pressure check valve

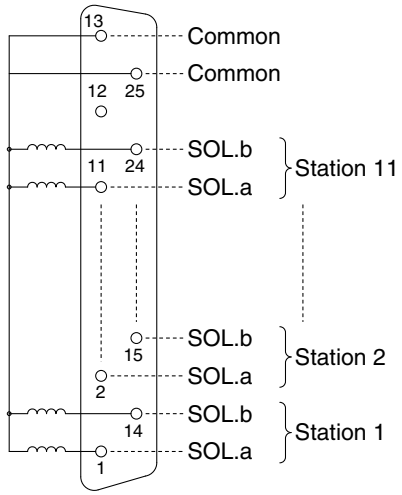

—	None
K	Built-in

∗ Built-in back pressure check valve type is applicable to series SV1000 only.
∗ Back pressure check valve is not available for 3 position valve.

Note) Refer to Specific Product Precautions 2 on page 111.

Manifold Electrical Wiring

10F/16F D-sub Connector Type (25 pins)

- This circuit has double wiring specifications for up to 11 stations. Since the usable number of solenoids differs depending on the manifold type, refer to the table below.
  In the case of single solenoids, connect to SOL.A. Furthermore, when wiring is specified on the manifold specification sheet, connections are made without skipping any connectors, and signals A for single and A, B for double are in order 1 → 14 → 2 → 15, etc.
- Stations are counted from D side (connector side) as the 1st.
- Since solenoid valves do not have polarity, either the +COM or –COM can be used.

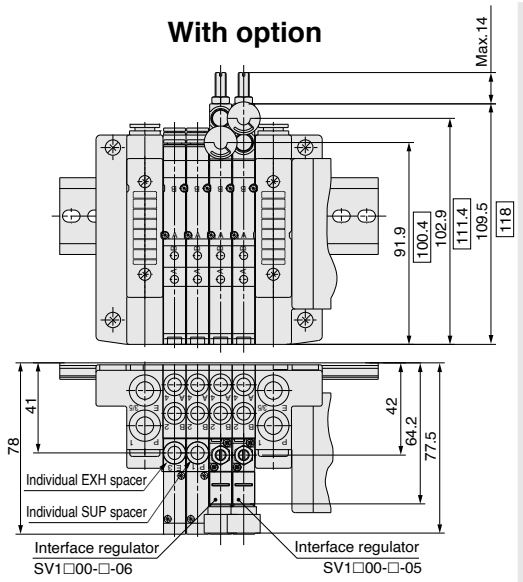

Usable No. of Solenoids

Model		Max. no. of solenoids
Tie-rod base type 10	SV1000 to SV4000	23
Cassette base type 16	SV1000	18
	SV2000	23

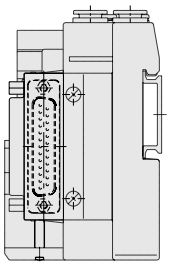

Dimensions: Series SV1000 for D-sub Connector

● **Cassette base manifold: SS5V1-16FD$^{1}_{2}$- Stations $^{U}_{D}$ (S, R, RS)- $^{C3, N1}_{C4, N3}$ $^{}_{C6, N7}$**

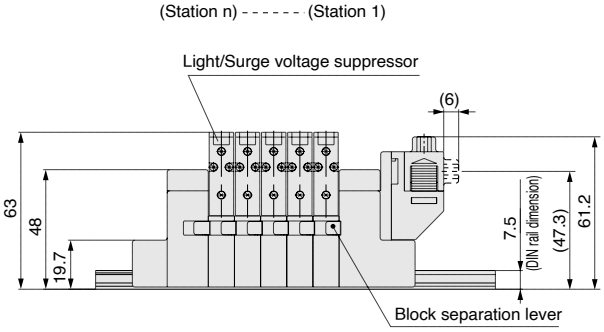

With option

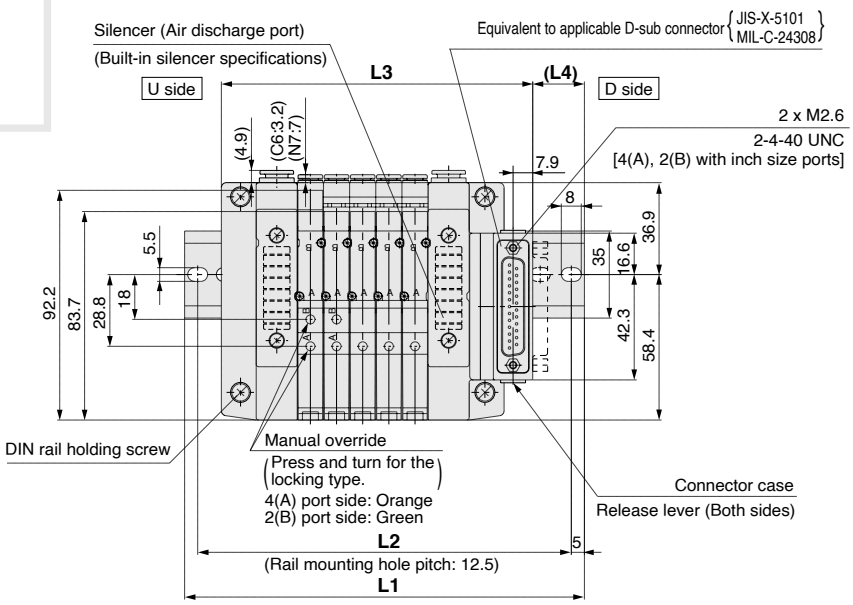

Dimensions are the ones for SV1300-□□-□.

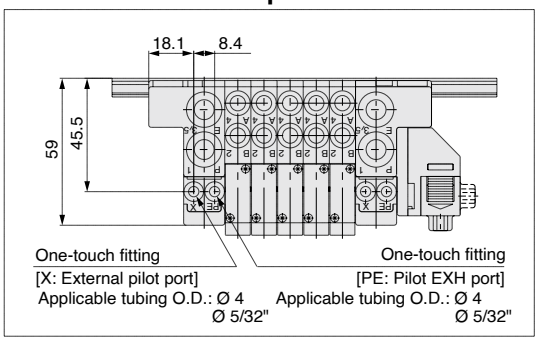

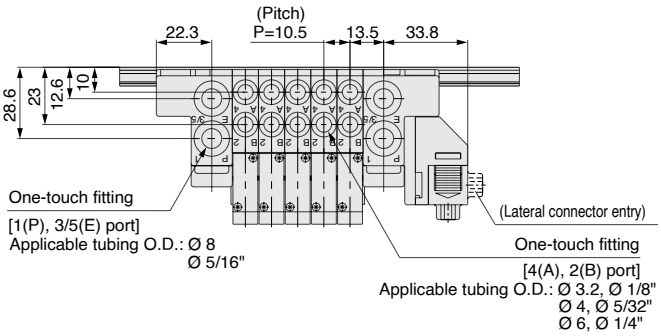

- When P, E port outlets are indicated on the U side or D side, the P, E ports on the opposite side are plugged.
- External pilot port positions and silencer discharge port positions are the same as P, E port outlet positions.

Flat Ribbon Cable Connector

Tie-rod base

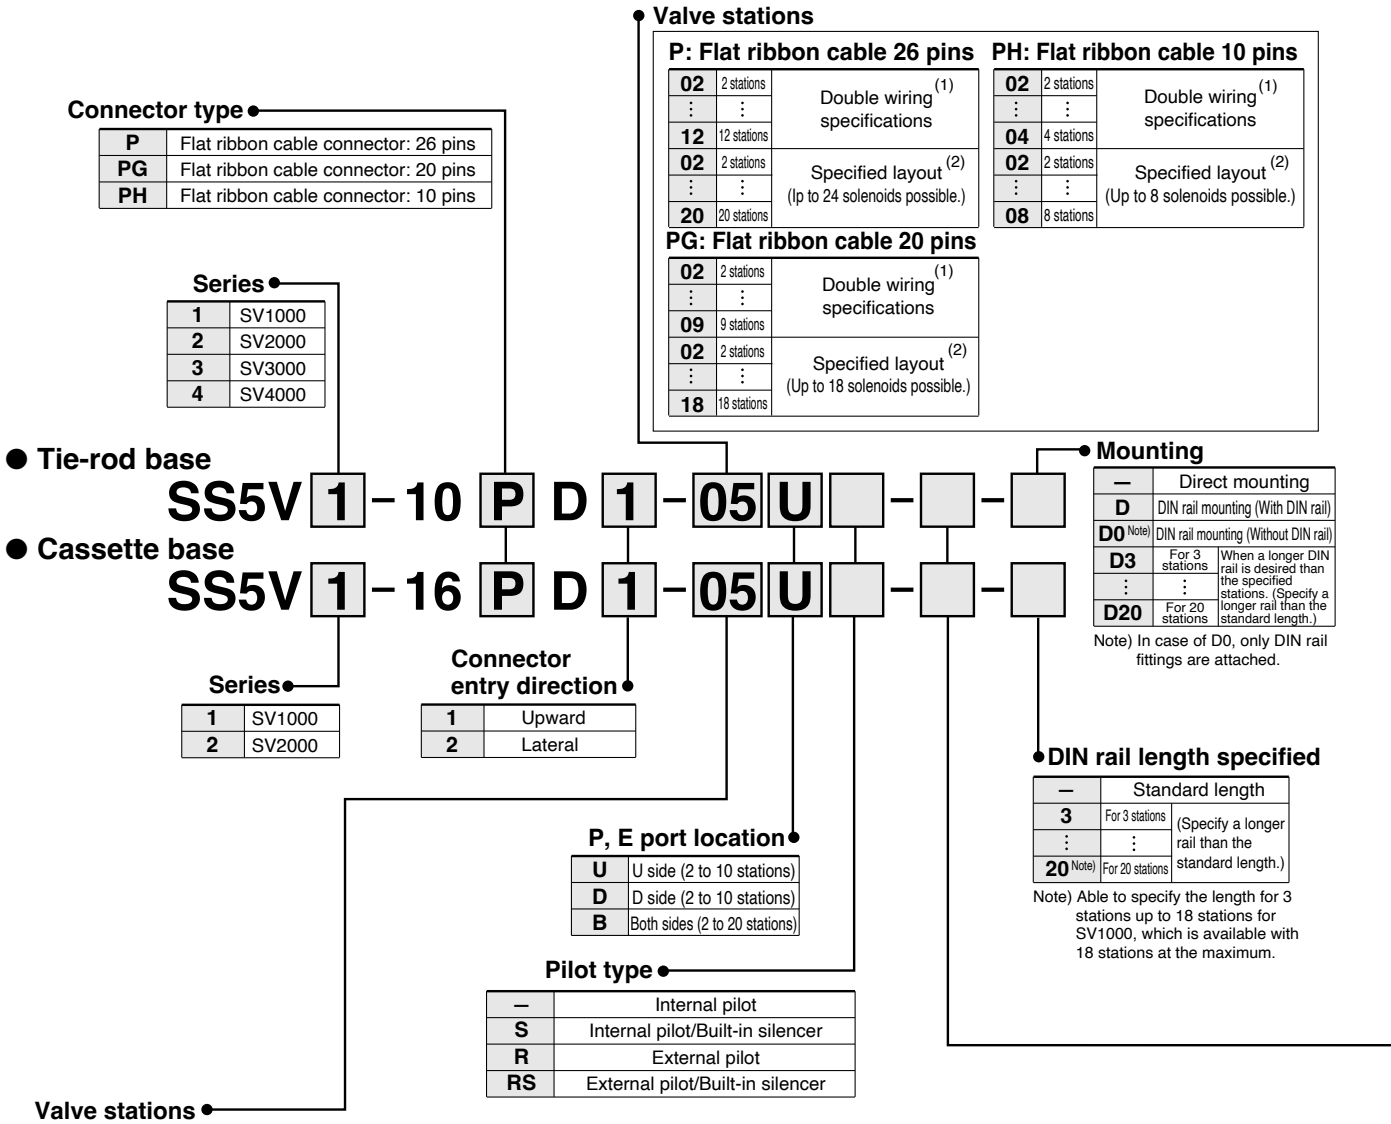

Cassette base

Applicable series	Cassette base manifold **SV1000/SV2000**
	Tie-rod base manifold **SV1000/SV2000/SV3000/SV4000**
	• Number of connectors: 26, 20, 10 pins • With strain relief Conforming to MIL-C-83503

Flat Ribbon Cable Connector
Series SV

How to Order Manifold

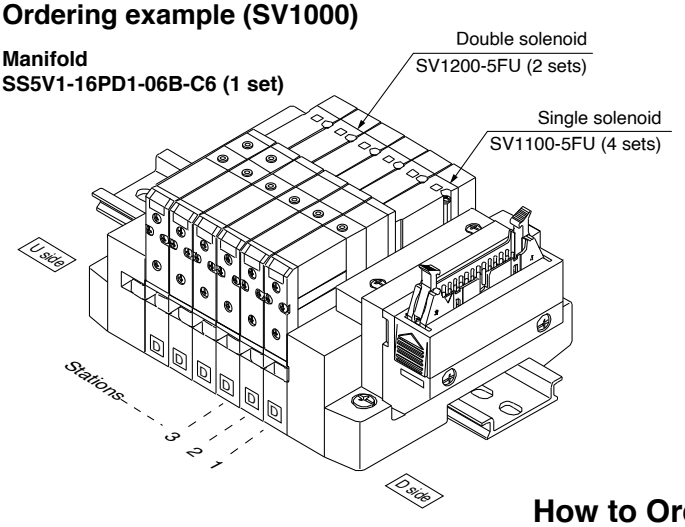

Note 1) Double wiring specifications: Single, double, 3 and 4 position solenoid valves can be used on all manifold stations. Use of a single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.

Note 2) Specified layout: Indicate wiring specifications on a manifold specification sheet. (Note that double, 3 and 4 position valves cannot be used where single solenoid wiring has been specified.)

How to Order Valve Manifold Assembly

Ordering example (SV1000)

Manifold
SS5V1-16PD1-06B-C6 (1 set)

SS5V1-16PD1-06B-C6·····1 set (manifold part no.)
∗ SV1100-5FU·····4 sets (Single solenoid part no.)
∗ SV1200-5FU·····2 sets (Double solenoid part no.)

How to Order Valve

SV 1 1 00 □ □ – 5 F □ □ – □ – □ Note)

Note) Available with manifold block for station additions. Refer to pages 88 and 94.

Series

1	SV1000
2	SV2000
3	SV3000
4	SV4000

Type of actuation

1	2 position single
2	2 position double
3	3 position closed centre
4	3 position exhaust centre
5	3 position pressure centre
A	4 position dual 3 port valve: N.C./N.C.
B	4 position dual 3 port valve: N.O./N.O.
C	4 position dual 3 port valve: N.C./N.C.

∗ 4 position dual 3 port valves are applicable to Series SV1000 and SV2000 only.

Rated voltage

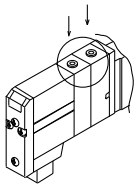

5	24 V DC
6	12 V DC

Made to Order

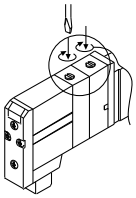

—	—
X90	Main valve fluororubber (Refer to page 109.)

Manual override

—: Non-locking push type

D: Push-turn locking slotted type

Back pressure check valve

—	None
K	Built-in

∗ Built-in back pressure check valve type is applicable to series SV1000 only.
∗ Back pressure check valve is not available for 3 position valve.

Pilot type

—	Internal pilot
R	External pilot

∗ External pilot specifications is not available for 4 position dual 3 port valves.

Note) Refer to Specific Product Precautions 2 on page 111.

M	A, B ports mixed		

∗ In the case of mixed specifications (M), indicate separately on the manifold specification sheet.
∗ Port sizes of X, PE port for external pilot specification (R, RS) are Ø 4 (metric), Ø 5/32" (inch) for SV1000/2000 and Ø 6(metric) and Ø 1/4" (inch) for SV3000/4000.

Manifold Electrical Wiring

10P/16P Flat Ribbon Cable Type (26 pins)

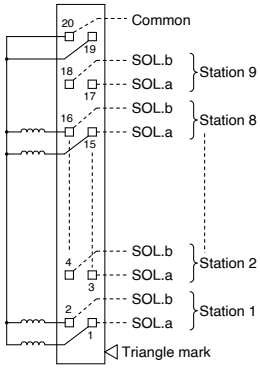

- This circuit has double wiring specifications for up to 12 stations. Since the usable number of solenoids differs depending on the manifold type, refer to the table below. In the case of single solenoids, connect to SOL. A. Furthermore, when wiring is specified on a manifold specification sheet, connections are made without skipping any connectors, and signals A for single and A, B for double are in order 1 → 2 → 3 → 4, etc.
- Stations are counted from D side (connector side) as the 1st one.
- Since terminal numbers are not indicated on the flat cable, use the triangle mark as a reference for wiring.
- Since solenoid valves do not have polarity, either the +COM or –COM can be used.

Usable No. of Solenoids

Model		Max. no. of solenoids
Tie-rod base type 10	SV1000 to SV4000	24
Cassette base type 16	SV1000	18
	SV2000	24

10PG/16PG Flat Ribbon Cable Type (20 pins)

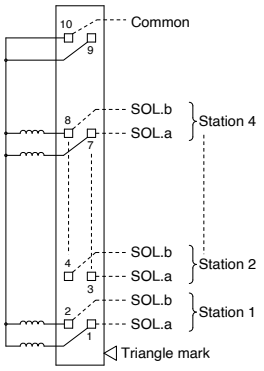

- This circuit has double wiring specifications for up to 9 stations. Since the usable number of solenoids differs depending on the manifold type, refer to the table below. In the case of single solenoids, connect to SOL. A. Furthermore, when wiring is specified on a manifold specification sheet, connections are made without skipping any connectors, and signals A for single and A, B for double are in order 1 → 2 → 3 → 4, etc.
- Stations are counted from D side (connector side) as the 1st one.
- Since terminal numbers are not indicated on the flat cable, use the triangle mark as a reference for wiring.
- Since solenoid valves do not have polarity, either the +COM or –COM can be used.

Usable No. of Solenoids

Model		Max. no. of solenoids
Tie-rod base type 10	SV1000 to SV4000	18
Cassette base type 16	SV1000	
	SV2000	

10PH/16PH Flat Ribbon Cable Type (10 pins)

- This circuit has double wiring specifications for up to 4 stations. Since the usable number of solenoids differs depending on the manifold type, refer to the table below. In the case of single solenoids, connect to SOL. A. Furthermore, when wiring is specified on a manifold specification sheet, connections are made without skipping any connectors, and signals A for single and A, B for double are in order 1 → 2 → 3 → 4, etc.
- Stations are counted from D side (connector side) as the 1st one.
- Since terminal numbers are not indicated on the flat cable, use the triangle mark as a reference for wiring.
- Since solenoid valves do not have polarity, either the +COM or –COM can be used.

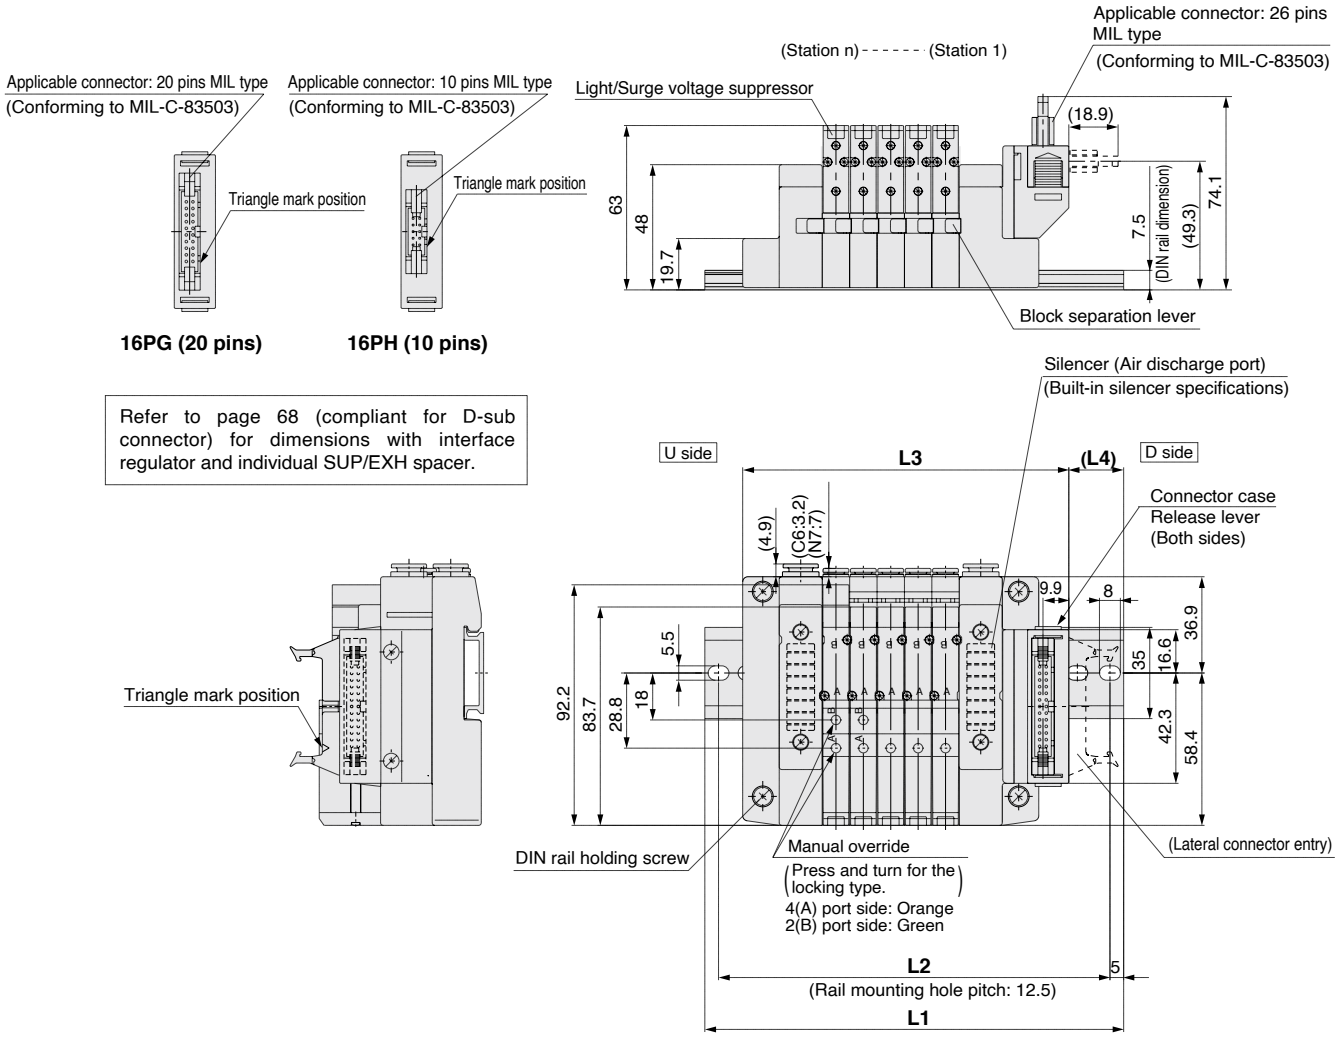

Usable No. of Solenoids

Model		Max. no. of solenoids
Tie-rod base type 10	SV1000 to SV4000	8
Cassette base type 16	SV1000	
	SV2000	

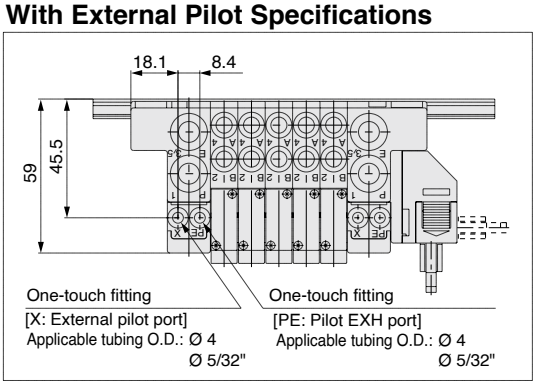

Dimensions: Series SV1000 for Flat Ribbon Cable

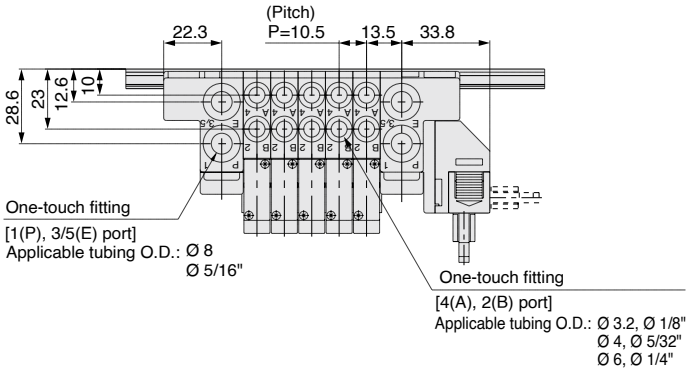

● Cassette base manifold : SS5V1-16 $^{P}_{PG}$ ^{PH} D^{1}_{2} - Stations $^{U}_{D}$ ^{B} (S, R, RS)- $^{C3, N1}_{C4, N3}$ $^{C6, N7}$

- When P, E port outlets are indicated on the U side or D side, the P, E ports on the opposite side are plugged.
- External pilot port positions and silencer discharge port positions are the same as P, E port outlet positions.

Type 16: Cassette Base Manifold

How to increase manifold bases (Type 16)

(1) Loosen the screws ⓐ (2 pcs. on one side) that hold the manifold base onto the DIN rail. (When removing the manifold base from the DIN rail, loosen the holding screws at four locations.)

(2) Using a flat head screwdriver, etc., pull the lever ⓑ forward on the manifold block assembly where a station is to be added, and disconnect the manifold block assemblies.

(3) Attach the manifold block assembly to be added to the DIN rail as shown in the figure.

Hook this part onto the DIN rail, and press down in the direction of the arrow.

Figure. Block mounting procedure

(4) Connect the block assemblies by pressing them together, and push the lever ⓑ in firmly until it stops.
Then secure them to the DIN rail by tightening the screws ⓐ.

⚠ **Caution** (Tightening torque: 1.4 N·m)

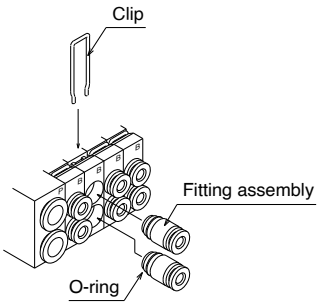

⚠ Caution

Fitting assembly replacement

By replacing manifold fitting assemblies, it is possible to change the size of the A, B ports and P, E ports. To replace them, Remove the clip with a flat head screwdriver, etc., and pull out the fitting assembly. Mount the new fitting assembly by inserting it and then replacing the clip to its fully inserted position.

Fitting Assembly Part No.

P, E Port	One-touch fitting for Ø 8	VVQ1000-51A-C8	—
	One-touch fitting for Ø 10	—	VVQ2000-51A-C10
	One-touch fitting for Ø 5/16"	VVQ1000-51A-N9	—
	One-touch fitting for Ø 3/8"	—	VVQ2000-51A-N11

Note 1) Be careful to avoid damage or contamination of O-rings, as this can cause air leakage.

Note 2) When removing a fitting assembly from a valve, after removing the clip, attach tubing or a plug (KQ2P-□□) to the One-touch fitting, and pull it out while holding the tubing (or plug). If it is pulled out while holding the release button of the fitting assembly (resin part), the release button may be damaged.

Note 3) Be sure to shut off the power and air supplies before disassembly. Furthermore, since air may remain inside the actuator, piping and manifold, confirm that the air is completely exhausted before performing any work.

■ How to order cassette base type 16 solenoid valves with manifold block

[Series SV1000/SV2000]

• Type with manifold block is used when adding stations, etc.

SV 1 1 00 – 5 F – – – –

Series

1	SV1000
2	SV2000

Type of actuation

1	2 position single
2	2 position double
3	3 position closed centre
4	3 position exhaust centre
5	3 position pressure centre
A	4 position dual 3 port valve: N.C./N.C.
B	4 position dual 3 port valve: N.O./N.O.
C	4 position dual 3 port valve: N.C./N.O.

Pilot type

—	Internal pilot
R	External pilot

∗ External pilot specifications is not available for 4 position dual 3 port valves.

Back pressure check valve

—	None
K	Built-in

∗ Back pressure check valve is not available for 3 position valve.
∗ Built-in back pressure check valve type is applicable to series SV1000 only.

Note) Refer to Specific Product Precautions 2 on page 111.

Rated voltage

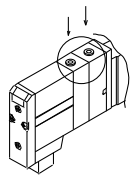

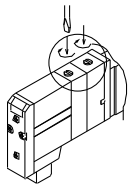

5	24 V DC
6	12 V DC

∗ Note that serial wiring manifolds (EX250, EX260, EX120, EX126, EX500, EX600) and PC wiring are only available with 24 V DC.

Light/Surge voltage suppressor

U	With light/surge voltage suppressor
R	With surge voltage suppressor

Manual override

Mounting Screw Tightening Torques

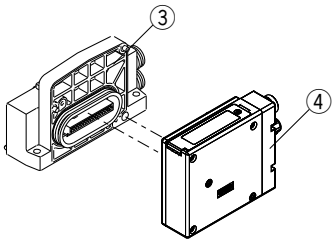

M2: 0.15 N·m
M3: 0.6 N·m
M4: 1.4 N·m
M5: 2.9 N·m
Unless otherwise indicated, tighten mounting screws to the torques shown above.

EX600 (Type 10S6□□□□D)

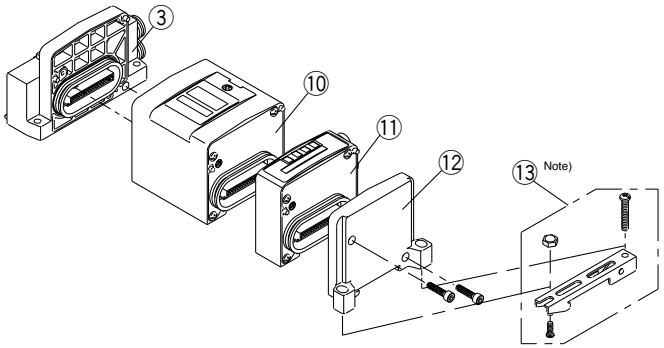

Note) Included only with the DIN rail mounting style. (Tightening torque of DIN rail holding screw: 0.5 N·m)

EX500 (Type 10S1□□D)

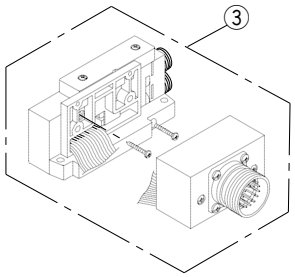

EX250 (Type 10S1□W)

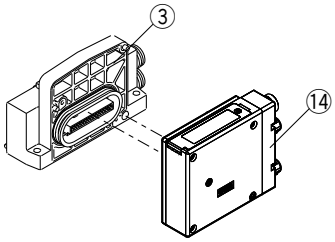

Note) Included only with the DIN rail mounting style. (Tightening torque of DIN rail holding screw: 0.5 N·m)
For the SV2000 series, mounting orientation onto DIN rail gets reversed.

Circular connector (Type 10C)

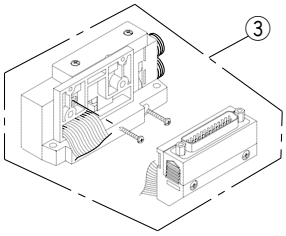

EX260 (Type 10S1□□D)

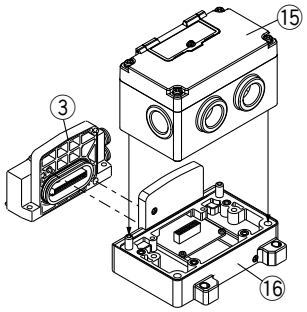

* ⑭ is not included in the SUP/EXH block assembly.

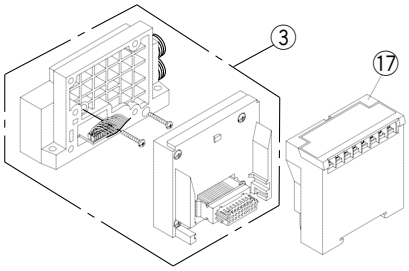

D-sub connector (Type 10F)

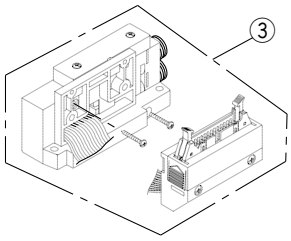

EX126 (Type 10S4□D)

EX120 (Type 10S3□)

For flat ribbon cable connector (Type 10P□)

Note 1) Two pieces of ㉑ and ㉒ (tie-rod) are required for Series SV1000, and three pieces are required for Series SV2000, 3000 and 4000.
Two pieces of ㉓ (valve mounting screw) are required for Series SV1000, 2000 and 3000, and three pieces are required for Series SV4000.
Note 2) The wireless system is suitable for use only in a country where it is in accordance with the Radio Act and regulations of that country.

Type 10: Tie-rod Base Manifold

How to increase manifold bases (Type 10)

(1) Loosen the U side screws ⓐ, and remove the SUP/EXH end block assembly ②.

(2) Screw in the tie-rods ⑭ for station addition.
(Screw them in until there is no gap between the tie-rods.)

(3) Connect the manifold assembly ① and supply/exhaust end block assembly ② to be added, and tighten the screws ⓐ.

⚠ Caution Tightening torques ⓐ

SV1000, SV2000	0.6 N·m
SV3000	1.4 N·m
SV4000	2.9 N·m

Note) When eliminating manifold stations, the appropriate tie-rods ⑬ for the desired change should be ordered separately.
(When equipped with a DIN rail, be sure to tighten the DIN rail holding screws after tightening the tension bolts.)

⚠ Caution

Fitting Assembly Replacement

By replacing manifold fitting assemblies, it is possible to change the size of the A, B ports and P, E ports. To replace them, remove the clip with a flat head screwdriver, etc., and pull out the fitting assembly.
Mount the new fitting assembly by inserting it and then replacing the clip to its fully inserted position.

Fitting Assembly Part No.

■ 1/4, 3/8 thread type port block assembly

For A, B port

SY9000 − 58A − 02 / 03 □

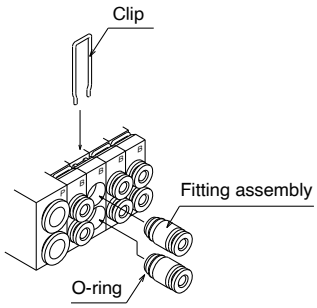

For P, E port

SY9000 − 58B − 03 □

Thread type

—	Rc
F	G
N	NPT
T	NPTF

Note 1) Be careful to avoid damage or contamination of O-rings, as this can cause air leakage.

Note 2) When removing a fitting assembly from a valve, after removing the clip, attach tubing or a plug (KQP-□□) to the One-touch fitting, and pull it out while holding the tubing (or plug). If it is pulled out while holding the release button of the fitting assembly (resin part), the release button may be damaged. However, 02 and 03 port block assemblies should be pulled out as they are.

Note 3) Be sure to shut off the power and air supplies before disassembly. Furthermore, since air may remain inside the actuator, piping and manifold, confirm that the air is completely exhausted before performing any work.

■ How to order tie-rod type 10 solenoid valves with manifold block

[Series SV1000 to SV4000]

• Type with manifold block is used when adding stations, etc.

SV □1□00 □□ − 5 F □□ − □□ − □ − □

A, B port size

Refer to "How to Order" on pages 27, 39, 45, 65 and 76.

Manifold wiring specifications

—	Double wiring
S	Single wiring

Made to Order

—	—
X90	Main valve fluororubber (Refer to page 109.)

1	SV1000
2	SV2000
3	SV3000
4	SV4000

Type of actuation

1	2 position single
2	2 position double
3	3 position closed centre
4	3 position exhaust centre
5	3 position pressure centre
A	4 position dual 3 port valve: N.C./N.C.
B	4 position dual 3 port valve: N.O./N.O.
C	4 position dual 3 port valve: N.C./N.O.

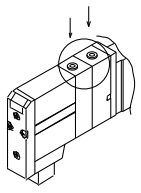

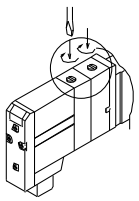

∗ 4 position dual 3 port valves are applicable to Series SV1000 and SV2000 only.

Manifold block type

T	For Tie-rod base type 10 with manifold block

Note) Tie-rod type 10 includes tie-rods for station additions.

Manual override

—: Non-locking push type	**D**: Push-turn locking slotted type
	

Pilot type

—	Internal pilot
R	External pilot

∗ External pilot specifications is not available for 4 position dual 3 port valves.

Back pressure check valve

—	None
K	Built-in

∗ Built-in back pressure check valve type is applicable to series SV1000 only.

∗ Back pressure check valve is not available for 3 position valve.

Note) Refer to Specific Product Precautions 2 on page 111.

Light/Surge voltage suppressor

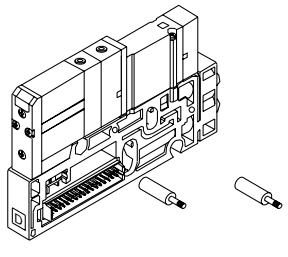

U	With light/surge voltage suppressor
R	With surge voltage suppressor

Rated voltage

5	24 V DC
6	12 V DC

∗ Note that serial wiring manifolds (EX250, EX260, EX120, EX126, EX500, EX600) and PC wiring are only available with 24 V DC.

Example (SV1000)
SV1200-5FU-T-C6

Series SV
Manifold Options (Common for Type 16 and 10)

■ Relay output module

By adding a relay output module to a series SV manifold, devices up to 110 V AC, 3 A (large type solenoid valves, etc.) can be controlled together with Series SV valves.

How to Order **SV □ 000 − 60 − 5 A − 1A**

Series

1	SV1000
2	SV2000
3	SV3000
4	SV4000

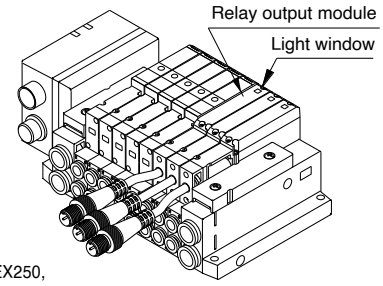

No. of output point

A	1 output
B	2 outputs

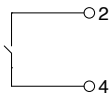

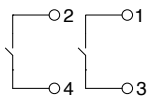

Rated voltage

5	24 V DC
6	12 V DC

∗ Note that serial wiring manifolds (EX250, EX260, EX120, EX126, EX500, EX600) and PC wiring are only available with 24 V DC.

Relay Output Module Specifications

Item	Specifications			
No. of output points	1 output [connector with lead wire (M12)]		2 outputs [connector with lead wire (M12)]	
Output type	 Contact type (“a” contact)		 Contact type (“a” contact)	
Load voltage	110 V AC	30 V DC	110 V AC	30 V DC
Load current	3 A	3 A	0.3 A	1 A
Indicator light	Red		A side: Red B side: Green	
Enclosure	Based on IP67 (IEC60529)			
Current consumption	20 mA or less			
Polarity	Non-polar			
weight (g)	48			

Connection Destination (Female Side) Connector Cable

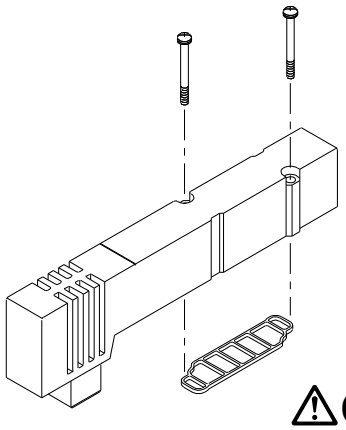

Connector size	pin	Manufacturer	Applicable series
M12	4	Correns Corp.	VA-4D
		OMRON Corp.	XS2
		Azbil Corp.	PA5-41
		Hirose Electric Co., Ltd.	HR24
		DDK Ltd.	CM01-8DP4S

∗ This connector is a female connector for ① relay output module and ② single unit/sub-plate.

Manifold Options

■ Blanking plate assembly

Used in situations where valves will be added in the future or for maintenance.

Series	Blanking plate assembly part no.
SV1000	SV1000-67-1A
SV2000	SV2000-67-1A
SV3000	SV3000-67-1A
SV4000	SV4000-67-1A

⚠Caution

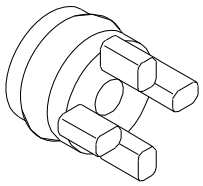

Mounting screw tightening torques

M2: 0.16 N·m
M3: 0.8 N·m
M4: 1.4 N·m

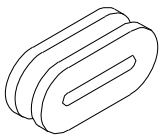

■ SUP/EXH block disk

[SUP block disk]
By placing a SUP block disk in a manifold valve's pressure supply passage, two different high and low pressures can be supplied to one manifold.

[EXH block disk]
By installing an EXH block disk in a manifold valve's exhaust passage, the valve's exhaust can be separated so that it will not affect other valves. It can also be used on a manifold with mixed positive pressure and vacuum.
(Two pieces are required to block EXH on both sides. However, Series SV1000 and 2000 type 10 manifolds require only one piece.)

Cassette base type 16

Tie-rod base type 10

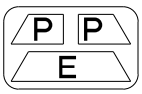

Series	Manifold Model	SUP block disk	EXH block disk
SV1000	10	SV1000-59-1A	SV1000-59-2A
	16	SX3000-77-1A	SX3000-77-1A

Pressure gauge option

M1	Without pressure gauge
00	With MPa indication pressure gauge
N0	With psi indication pressure gauge Note 2)

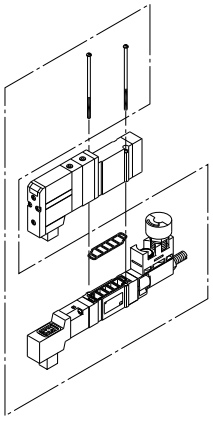

Regulating port

P	P port
A1	A port (P controlled type, A port regulation)
B1	B port (P controlled type, B port regulation)

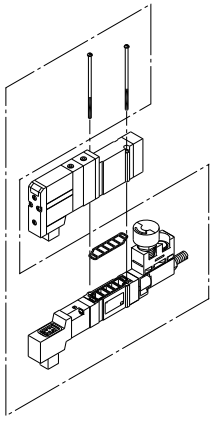

Note) 1(P) port pressure regulation is only available for 3-position closed centre and pressure centre, and 4-position dual 3-port valves.

Note 1) In the case of Series SV1000 with a pressure gauge when mounting on the manifold, use caution that the part numbers are different between the odd no. stations and the even no. stations to avoid pressure gauges from interfering from each others.
Note 2) The units with the psi indication are sold only overseas according to the new measurement law in Japan.
Note 3) Use caution that the part numbers will differ depending on the one for single/double and 4- and 3-position due to the different length of solenoid valves. Also, if the one for 3 position is included in the same manifold, use all the ones for 3-position.

* In the series SV3000, only type 10 is compatible with the double-stack spacers.
The series SV4000 is not compatible with the double-stack spacers.
Individual SUP and EXH spacers can be mounted either on the top or the bottom.

Series SV Solenoid Valve Specifications

Fluid		Air
Internal pilot operating pressure range (MPa)	**2 position single** **4 position dual 3 port valve**	0.15 to 0.7
	2 position double	0.1 to 0.7
	3 position	0.2 to 0.7
External pilot operating pressure range (MPa)	**Operating pressure range**	-100 kPa to 0.7
	2 position single, double **3 position**	0.25 to 0.7
Ambient and fluid temperature (°C)		-10 to 50 (No freezing)
Max. operating frequency (Hz)	**2 position single, double** **4 position dual 3 port valve**	5
	3 position	3
Manual override		Non-locking push type
		Push-turn locking slotted type
Pilot exhaust method	**Internal pilot**	Common exhaust type for main and pilot valve
	External pilot	Pilot valve individual exhaust
Lubrication		Not required
Mounting orientation		Unrestricted
Impact/Vibration resistance (ms²)		150/30
Enclosure		IP67 (Based on IEC60529)
Electrical entry		M12 waterproof connector
Coil rated voltage		24 V DC, 12 V DC
Allowable voltage fluctuation		±10 % of rated voltage
Power consumption (W)		0.6 (With indicator light: 0.65)
Surge voltage suppressor		Zener diode
Indicator light		LED

Note) Impact resistance: No malfunction occurred when it is tested with a drop tester in the axial direction and at the right angles to the main valve and armature in both energised and de-energised states every once for each condition. (Values at the initial period)
Vibration resistance: No malfunction occurred in a one-sweep test between 45 and 2000 Hz. Test was performed at both energised and de-energised states in the axial direction and at the right angles to the main valve and armature. (Values at the initial period)

Response Time

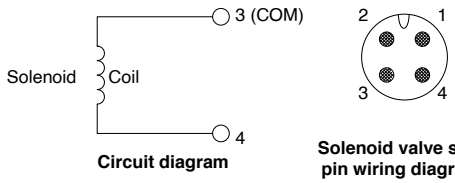

Type of actuation	Response time (ms) (at the pressure of 0.5 MPa)

Series ***SV***

Made to Order Specifications

Made to Order

Please contact SMC for detailed dimensions, specifications and lead times.

1 Main Valve Fluororubber Specifications

Symbol

-X90

Fluororubber is used for rubber parts of the main valve to allow use in applications such as the following.

1. When using a lubricant other than the recommended turbine oil, and there is a possibility of malfunction due to swelling of the spool valve seals.

2. When ozone enters or is generated in the air supply.

Model no. SV 1 2 3 4 □ 00 – □□□□ – □ – X90

Entry is the same as standard products.

Note) Because in series -X90 fluororubber is used for only main valve, the rubber parts of the application/usage in conditions requiring heat resistance should be avoided.

Series SV
Specific Product Precautions 1

Be sure to read this before handling the products. For safety instructions and 3/4/5-port solenoid valve precautions, refer to the "Handling Precautions for SMC Products" and the "Operation Manual" on the SMC website: https://www.smc.eu

Environment

⚠Warning

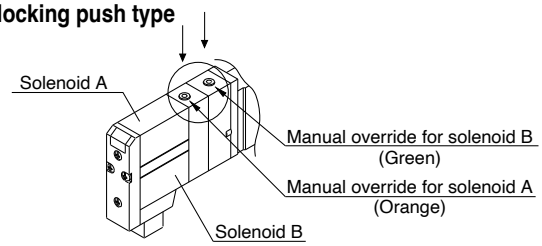

1. Do not use valves in atmospheres of corrosive gases, chemicals, salt water, water, steam, or where there is direct contact with any of these.
2. Products compliant with IP65 and IP67 enclosures (Based on IEC60529) are protected against dust and water, however, these products cannot be used in water.
3. Products compliant with IP65 and IP67 enclosures satisfy the specifications by mounting each product properly. Be sure to read the Specific Product Precautions for each product.
4. When using built-in silencer type manifold with an IP67 enclosure, keep the exhaust port of the silencer from coming in direct contact with water or other liquids. Liquid filtration through the exhaust port of the silencer can cause damage to

Manual Override Operation

⚠Warning

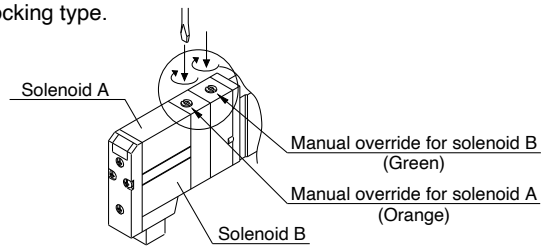

Handle carefully, as connected equipment can be actuated through manual override operation.

■ Non-locking push type

■ Push-turn locking slotted type

After pushing down, turn in the direction of the arrow.
If it is not turned, it can be operated the same way as the non-locking type.

⚠Caution

When locking the manual override with the push-turn locking slotted type, be sure to push it down before turning.
Turning without first pushing it down can cause damage to the manual override and other trouble such as air leakage, etc.

Exhaust Restriction

⚠Caution

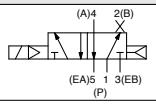

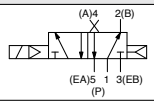

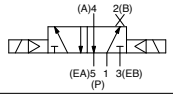

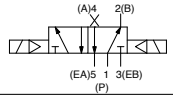

Since Series SV is a type in which the pilot valve exhaust joins the main valve exhaust inside the valve, use caution, so that the piping from the exhaust port is not restricted.

Series SV Used as a 3 Port Valve

⚠Caution

In the case of using a 5 port valve (as a 3 port valve)

Series SV can be used as normally closed (N.C.) or normally open (N.O.) 3 port valves by closing one of the cylinder ports (A or B) with a plug. However, they should be used with the exhaust ports kept open. They are convenient at times when a double solenoid type 3 port valve is required.

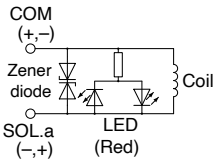

Plug position		B port	A port
Actuation		N.C.	N.O.
Number of solenoids	Single		
	Double		

Light/Surge Voltage Suppressor

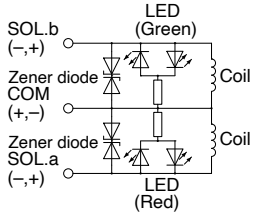

⚠Caution

Solenoid valves have no polarity.
Light/Surge voltage suppressor

Single solenoid

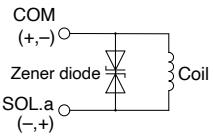

Double solenoid, 3 position type

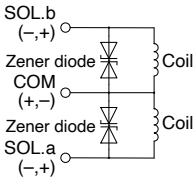

Surge voltage suppressor

Single solenoid

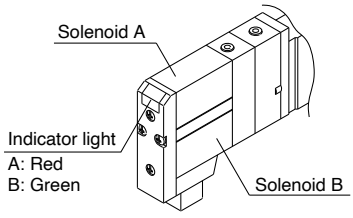

Double solenoid, 3 position type

Light Indication

⚠Caution

When equipped with indicator light and surge voltage suppressor, the light window turns red when solenoid A is energised, and it turns green when solenoid B is energised.

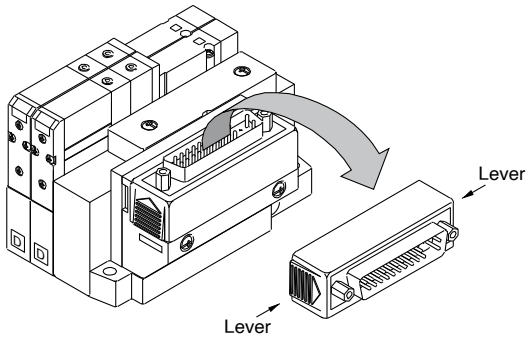

Specific Product Precautions 2

Be sure to read this before handling the products. For safety instructions and 3/4/5-port solenoid valve precautions, refer to the "Handling Precautions for SMC Products" and the "Operation Manual" on the SMC website: https://www.smc.eu

Connector Entry Directions

⚠Caution

Connector entry directions for D-sub connectors and flat ribbon cables can be changed. To change the connector's entry direction, press the levers on both sides of the connector, take it off, and change the direction as shown in the drawing. Since lead wire assemblies are attached to the connector, excessive pulling or twisting can cause broken wires or other trouble. Also, take precautions so that lead wires are not caught and pinched when installing the connector.

Manifold Mounting

⚠Caution

There will be slight variations in the width of manifold blocks due to tolerance for the stacking manifold type.
As the manifold is made up of a combination of manifold blocks, there will be an error due to accumulated tolerance between the actual pitch dimensions of the mounting holes used to secure the manifold and the values stated in the catalogue. Keep this in mind when increasing the number of stations.

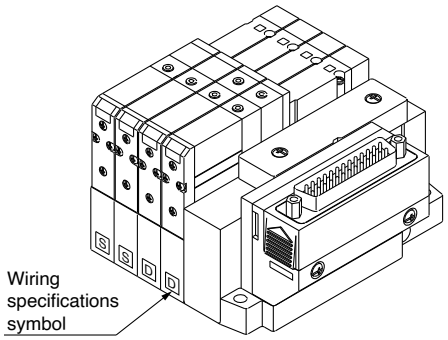

Manifold Block Width Tolerance Chart

Series	Block width tolerance
SS5V1-(W)10□ series	±0.15 mm
SS5V2-(W)10□ series	±0.2 mm
SS5V3-(W)10□ series	±0.15 mm
SS5V4-(W)10□ series	±0.15 mm

How to Order Manifold

⚠Caution

The letter "S" or "D" is indicated on manifold blocks for the SV series as shown below. This indication refers to the type of substrate assembly (single wiring or double wiring) inside the manifold blocks.
When the manifold specification sheet does not include a wiring specification, all stations will be double wiring specification (D). In this case, single and double solenoid valves can be mounted in any position, but when a single valve is used, there will be an unused control signal. To avoid this, indicate positions of manifold blocks for single wiring specification (S) and double wiring specification (D) on a manifold specification sheet. (Note that double, 3 or 4 position valves cannot be used for manifolds blocks with single wiring specification (S).)

Substrate Assemblies inside Manifolds

⚠Caution

Substrate assemblies inside of manifolds cannot be taken apart. Attempting to do so may damage parts.

One-touch Fittings

⚠Caution

1. Tube attachment/detachment for One-touch fittings

1) Attaching of tube

(1) Take a tube having no flaws on its periphery and cut it off at a right angle. When cutting the tube, use tube cutters TK-1, 2 or 3. Do not use pinchers, nippers or scissors, etc. If cutting is done with tools other than tube cutters, there is the danger that the tube may be cut diagonally or become flattened, etc., making a secure installation impossible, and causing problems such as the tube pulling out after installation or air leakage. Also allow some extra length in the tube.

(2) Grasp the tube and push it in slowly, inserting it securely all the way into the fitting.

(3) After inserting the tube, pull on it lightly to confirm that it will not come out. If it is not installed securely all the way into the fitting, this can cause problems such as air leakage or the tube pulling out.

2) Detaching of tube

(1) Push in the release button sufficiently, and push the collar evenly at the same time.

(2) Pull out the tube while holding down the release button so that it does not come out. If the release button is not pressed down sufficiently, there will be increased bite on the tube and it will become more difficult to pull it out.

(3) When the removed tube is to be used again, cut off the portion which has been chewed before reusing it. If the chewed portion of the tube is used as is, this can cause trouble such as air leakage or difficulty in removing the tube.

Specific Product Precautions 3

Be sure to read this before handling the products. For safety instructions and 3/4/5-port solenoid valve precautions, refer to the "Handling Precautions for SMC Products" and the "Operation Manual" on the SMC website: https://www.smc.eu

Other Tubing Brands

⚠Caution

1. When using tube other than SMC brand, confirm that the following specifications are satisfied with respect to the outside diameter tolerance of the tube.

1) Nylon tubing within ±0.1 mm
2) Soft nylon tubing within ±0.1 mm
3) Polyurethane tubing within +0.15 mm
within –0.2 mm

Do not use tubing which does not meet these outside diameter tolerances. It may not be possible to connect them, or they may cause other trouble, such as air leakage or the tube pulling out after connection.

Back Pressure Check Valve Built-in Type

⚠Caution

1. Valves with built-in back pressure check valve is to protect the back pressure inside a valve. For this reason, use caution the valves with external pilot specification cannot be pressurized from exhaust port [3/5(E)]. As compared with the types which do not integrate the back pressure check valve, C value of the flow rate characteristics goes down. For details, please contact SMC.
2. Do not switch valves when A or B port is open to the atmosphere, or while the actuators and air operated equipment are in operation. The back pressure prevention seal may be peeled off, which may cause air leakage or malfunctions. Use caution especially when performing a trial operation or maintenance work.

Continuous Duty

⚠Caution

If a valve is energised continuously for long periods of time, the rise in temperature due to heat-up of the coil assembly may cause a decline in solenoid valve performance, reduce service life, or have adverse effects on peripheral equipment. In particular, if three or more adjacent stations on the manifold are energised simultaneously for extended periods of time or if the valves on A side and B side are energised simultaneously for long periods of time, take special care as the temperature rise will be greater. In such cases, if it is possible to select a valve with a power-saving circuit, be sure to do so.

UL Approved Product

⚠Caution

When conformity to UL is required, the product should be used with a UL1310 Class 2 power supply.

The product is a UL approved product only if it has a c UL us mark on the body.

Specific Product Precautions 4

Be sure to read this before handling the products. For safety instructions and 3/4/5-port solenoid valve precautions, refer to the "Handling Precautions for SMC Products" and the "Operation Manual" on the SMC website: https://www.smc.eu

⚠Caution

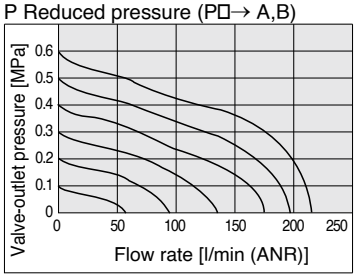

Specifications

Interface regulator		SV1□00-□-□	SV2000-□-□	SV3000-□-□	SV4000-□-□
Applicable model		SV1000	SV2000	SV3000	SV4000
Regulating port		P, A, B			
Set pressure range		0.1 to 0.7 MPa			
Maximum operating pressure		0.7 MPa			
Fluid		Air			
Ambient and fluid temp.		Maximum at 50 °C			
Weight	**With pressure gauge**	38.4 g (43.4 g)	86.5 g	103.8 g	178.2 g
	Without pressure gauge	32 g (37 g)	80.3 g	97.6 g	171.8 g

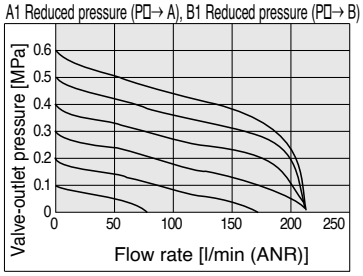

Note 1) Apply pressure from P port in the base for interface regulator.
Note 2) P port pressure regulation is only available for closed centre, pressure centre and 4-position dual 3-port valve.
Note 3) Gasket and mounting screws are included in the weight.
Note 4) ( ): Denotes the values of SV1300.

Flow Characteristics

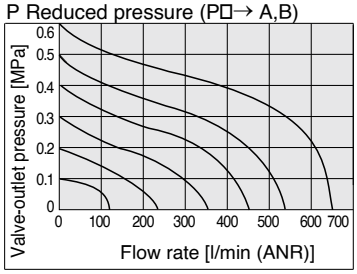

SV1000 P Reduced pressure (P□→ A,B)

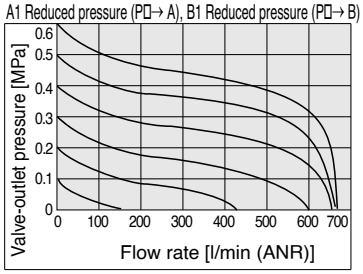

A1 Reduced pressure (P□→ A), B1 Reduced pressure (P□→ B)

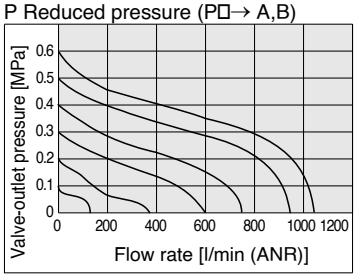

SV2000 P Reduced pressure (P□→ A,B)

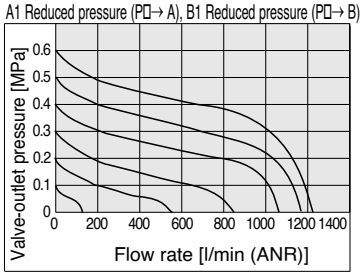

A1 Reduced pressure (P□→ A), B1 Reduced pressure (P□→ B)

SV3000 P Reduced pressure (P□→ A,B)

A1 Reduced pressure (P□→ A), B1 Reduced pressure (P□→ B)

Specific Product Precautions 5

Be sure to read this before handling the products. For safety instructions and 3/4/5-port solenoid valve precautions, refer to the "Handling Precautions for SMC Products" and the "Operation Manual" on the SMC website: https://www.smc.eu

Serial Wiring EX500/EX250/EX260/EX120 Precautions

⚠ Warning

1. **These products are intended for use in general factory automation equipment.**
   Avoid using these products in machinery/equipment which affects human safety, and in cases where malfunction or failure can result in extensive damage.
2. **Do not use in an explosive atmosphere, environment with inflammable gases, or corrosive atmosphere.**
   This can cause injury or fire, etc.
3. **Work such as transporting, installing, piping, wiring, operation, control and maintenance should be performed by personnel with specialised knowledge.**
   There is a danger of electrocution, injury or fire, etc.
4. **Install an external emergency stop circuit that can promptly stop operation and shut off the power supply.**
5. **Do not remodel these products, as there is a danger of injury and damage.**
6. **Do not wipe the product with chemicals, etc.**

⚠ Caution

1. **Read the instruction manual carefully, strictly observe the precautions and operate within the range of the specifications.**
2. **Do not drop these products or submit them to strong impacts. This can cause damage, failure or malfunction, etc.**
3. **In locations with poor electrical conditions, take steps to ensure a steady flow of the rated power supply. Use of a voltage outside of the specifications can cause malfunction, damage to the unit, electrocution or fire, etc.**
4. **Do not touch connector terminals or internal substrates when current is being supplied. There is a danger of malfunction, damage to the unit or electrocution if connector terminals or internal substrates are touched when current is being supplied.**
   Be sure that the power supply is OFF when adding or removing manifold valves or input blocks, etc., or when connecting or disconnecting connectors.
5. **Operate at an ambient temperature that is within the specifications. Even when the ambient temperature range is within the specifications, do not use in locations where there are rapid temperature changes.**
6. **Keep wire scraps and other extraneous material from getting inside these products. This can cause fire, failure or malfunction, etc.**
7. **Give consideration to the operating environment depending on the type of enclosure being used.**
   To achieve IP65 or IP67 protection, provide appropriate wiring between all units using electrical wiring cables, communication connectors and cables with M12 connectors. Also, provide waterproof caps when there are unused ports, and perform proper mounting of input units, input bolcks, SI units and manifold valves, etc. Provide a cover or other protection for applications in which there is constant exposure to water.
8. **Obey the proper tightening torque.**
   There is a possibility of damaging threads if tightening exceeds the tightening torque range.
9. **Provide adequate protection when operating in locations such as the following:**
   • Where noise is generated by static electricity, etc.
   • Where there is a strong electric field
   • Where there is a danger of exposure to radiation
   • When in close proximity to power supply lines

⚠ Caution

10. **When these products are installed in equipment, provide adequate protection against noise by using noise filters, etc.**
11. **Since these products are components that are used after installation in other equipment, the customer should confirm conformity to EMC directives for the finished product.**
12. **Do not remove the name plate.**
13. **Perform periodic inspections and confirm normal operation. It may otherwise be impossible to guarantee safety due to unexpected malfunction or erroneous operation.**
14. **Do not use in places where there are cyclic temperature changes.**
    In case that the cyclic temperature is beyond normal temperature changes, the inside the product is likely to be adversely effected.
15. **Do not use in direct sunlight.**
    Do not use in direct sunlight. It may cause malfunction or damage.
16. **Do not use in places where there is radiated heat around it.**
    Such a place is likely to cause malfunction.

Power Supply Safety Instructions

⚠ Caution

1. **Operation is possible with a single power supply or a separate power supply. However, be sure to provide two wiring systems (one for solenoid valves, and one for input and control units).**
2. **Use the following UL approved products for DC power supply combinations.**
   1) Controlled voltage current circuit conforming to UL508
      Circuit uses the secondary coil of an isolated transformer as the power supply, satisfying the following conditions.
      • Max. voltage (with no load): 30 Vrms (42.4 V peak) or less
      • Max. current: (1) 8 A or less (including shorts), and
      (2) When controlled by a circuit protector (fuse, etc.) with the following rating

No-load voltage (V peak)	Max. current rating
0 to 20 [V]	5.0
Over 20 [V] to 30 [V]	$\frac{100}{\text{Peak voltage value}}$

   2) A circuit (class 2 circuit) with maximum 30 Vrms (42.4 V peak) or less, and a power supply consisting of a class 2 power supply unit confirming to UL1310, or a class 2 transformer confirming to UL1585

Safety Instructions for Cable

⚠ Caution

1. **Be careful of mis-wiring. This can cause malfunction, damage and fire in the unit.**
2. **To prevent noise and surge in signal lines, keep all wiring separate from power lines and high voltage lines. Otherwise, this can cause malfunction.**
3. **Check wiring insulation, as defective insulation can cause damage to the unit due to excessive voltage or current.**
4. **Do not bend or pull cables repeatedly, and do not place heavy objects on them or allow them to be pinched. This can cause broken lines.**

Specific Product Precautions 6

Be sure to read this before handling the products. For safety instructions and 3/4/5-port solenoid valve precautions, refer to the "Handling Precautions for SMC Products" and the "Operation Manual" on the SMC website: https://www.smc.eu

EX600 Precautions

Design/Selection

⚠Warning

1. Use this product within the specification range.
Using beyond the specified specifications range can cause fire, malfunction, or damage to the system. Confirm the specifications when operating.

2. When using for an interlock circuit:
- **Provide a multiple interlock system which is operated by another system (such as mechanical protection function).**
- **Perform an inspection to check that it is working properly.**

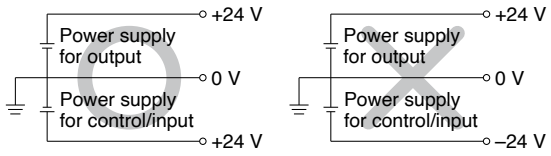

This may cause possible injury due to malfunction.

⚠Caution

1. When applicable to UL, use a Class 2 power supply unit conforming to UL1310 for direct current power supply.

2. Use this product within the specified voltage range.
Using beyond the specified voltage range is likely to cause the units and connecting devices to be damaged or to malfunction.

3. The power supply for the unit should be 0 V as the standard for both power supply for output as well as power supply for control/input.

4. Do not install a unit in a place where it can be used as a foothold.
Applying any excessive load such as stepping on the unit by mistake or placing a foot on it, will cause it to break.

5. Keep the surrounding space free for maintenance.
When designing a system, take into consideration the amount of free space needed for performing maintenance.

6. Do not remove the name plate.
Improper maintenance or incorrect use of operation manual can cause failure and malfunction. Also, there is a risk of losing conformity with safety standards.

7. Beware of inrush current when the power supply is turned on.
Some connected loads can apply an initial charge current which will trigger the over current protection function, causing the unit to malfunction.

Mounting

⚠Caution

1. When handling and assembling units:
- **Do not touch the sharp metal parts of the connector or plug.**
- **Do not apply excessive force to the unit when disassembling.**
  The connecting portions of the unit are firmly joined with seals.
- **When joining units, take care not to get fingers caught between units.**
  Injury can result.

Mounting

⚠Caution

2. Do not drop, bump, or apply excessive impact.
Otherwise, the unit can become damaged, malfunction, or fail to function.

3. Observe the tightening torque range.
Tightening outside of the allowable torque range will likely damage the screw.
IP67 cannot be guaranteed if the screws are not tightened to the specified torque.

4. When lifting a large size manifold solenoid valve unit, take care to avoid causing stress to the valve connection joint.
The connection parts of the unit may be damaged. Because the unit may be heavy, carrying and installation should be performed by more than one operator to avoid strain or injury.

5. When placing a manifold, mount it on a flat surface.
Torsion in the whole manifold can lead to trouble such as air leakage or defective insulation.

Wiring

⚠Caution

1. Confirm grounding to maintain the safety of the reduced wiring system and for anti-noise performance.
Provide a specific grounding as close to the unit as possible to minimise the distance to grounding.

2. Avoid repeatedly bending or stretching the cable and applying a heavy object or force to it.
Wiring applying repeated bending and tensile stress to the cable can break the circuit.

3. Avoid miswiring.
If miswired, there is a danger of malfunction or damage to the reduced wiring system.

4. Do not wire while energising the product.
There is a danger of malfunction or damage to the reduced wiring system or input/output equipment.

5. Avoid wiring the power line and high pressure line in parallel.
Noise or surge produced by signal line resulting from the power line or high pressure line could cause malfunction. Wiring of the reduced wiring system or input/output device and the power line or high pressure line should be separated from each other.

6. Confirm the wiring insulation.
Defective insulation (contact with other circuits, improper insulation between terminals, etc.) may cause damage to the reduced wiring system or input/output device due to excessive voltage or current.

Specific Product Precautions 7

Be sure to read this before handling the products. For safety instructions and 3/4/5-port solenoid valve precautions, refer to the "Handling Precautions for SMC Products" and the "Operation Manual" on the SMC website: https://www.smc.eu

EX600 Precautions

Wiring

⚠Caution

7. When a reduced wiring system is installed in machinery/equipment, provide adequate protection against noise by using noise filters, etc.

Noise in signal lines may cause malfunction.

8. When connecting wires of input/output device or Handheld Terminal, prevent water, solvent or oil from entering inside from the connecter section.

This can cause damage, equipment failure or malfunction.

9. Avoid wiring patterns in which excessive stress is applied to the connector.

This may cause malfunction or damage to the unit due to contact failure.

Operating Environment

⚠Warning

1. Do not use in an atmosphere containing an inflammable gas or explosive gas.

Use in such an atmosphere is likely to cause a fire or explosion. This system is not explosion-proof.

⚠Caution

1. Select the proper type of enclosure according to the environment of operation.

IP65/67 is achieved when the following conditions are met.

1) Provide appropriate wiring between all units using electrical wiring cables, communication connectors and cables with M12 connectors.

2) Suitable mounting of each unit and manifold valve.

3) Be sure to mount a seal cap on any unused connectors.

If using in an environment that is exposed to water splashes, please take measures such as using a cover. When the enclosure is IP40, do not use in an operating environment or atmosphere where it may come in contact with corrosive gas, chemical agents, seawater, water, or water vapour. When connected to EX600-D□□E or EX600-D□□F, manifold enclosure is IP40. Also, the Handheld Terminal conforms to IP20, so prevent foreign matter from entering inside, and water, solvent or oil from coming in direct contact with it.

2. Provide adequate protection when operating in locations such as the following.

Failure to do so may cause damage or malfunction. The effect of countermeasures should be checked in individual equipment and machine.

1) Where noise is generated by static electricity, etc.

2) Where there is a strong electric field

3) Where there is a danger of exposure to radiation

4) When in close proximity to power supply lines

Operating Environment

⚠Caution

3. Do not use in an environment where oil and chemicals are used.

Operating in environments with coolants, cleaning solvents, various oils or chemicals may cause adverse effects (damage, malfunction) to the unit even in a short period of time.

4. Do not use in an environment where the product could be exposed to corrosive gas or liquid.

This may damage the unit and cause it to malfunction.

5. Do not use in locations with sources of surge generation.

Installation of the unit in an area around the equipment (electromagnetic lifters, high frequency induction furnaces, welding machine, motors, etc.), which generates the large surge voltage could cause to deteriorate an internal circuitry element of the unit or result in damage. Implement countermeasures against the surge from the generating source, and avoid touching the lines with each other.

6. Use the product type that has an integrated surge absorption element when directly driving a load which generates surge voltage by relay, solenoid valves or lamp.

When a surge generating load is directly driven, the unit may be damaged.

7. The product is CE/UKCA marked, but not immune to lightning strikes. Take measures against lightning strikes in your system.

8. Keep dust, wire scraps and other extraneous material from getting inside the product.

This may cause malfunction or damage.

9. Mount the unit in such locations, where no vibration or shock is affected.

This may cause malfunction or damage.

10. Do not use in places where there are cyclic temperature changes.

In case that the cyclic temperature is beyond normal temperature changes, the internal unit is likely to be adversely effected.

11. Do not use in direct sunlight.

Do not use in direct sunlight. It may cause malfunction or damage.

12. Use this product within the specified ambient temperature range.

This may cause malfunction.

13. Do not use in places where there is radiated heat around it.

Such a place is likely to cause malfunction.

Specific Product Precautions 8

Be sure to read this before handling the products. For safety instructions and 3/4/5-port solenoid valve precautions, refer to the "Handling Precautions for SMC Products" and the "Operation Manual" on the SMC website: https://www.smc.eu

EX600 Precautions

Adjustment/Operation

⚠Warning

1. Do not perform operation or setting with wet hands.
There is a risk of electrical shock.

<Handheld Terminal>

2. Do not apply pressure to the LCD.
There is a possibility of the crack of LCD and injuring.

3. The forced input/output function is used to change the signal status forcibly. When operating this function, be sure to check the safety of the surroundings and installation.
Otherwise, injury or equipment damage could result.

4. Incorrect setting of parameters can cause malfunction. Be sure to check the settings before use.
This may cause injury or equipment damage.

⚠Caution

1. Use a watchmaker's screwdriver with thin blade for the setting of each switch of the SI Unit. When setting the switch, do not touch other unrelated parts.
This may cause parts damage or malfunction due to a short circuit.

2. Provide adequate setting for the operating conditions.
Failure to do so could result in malfunction. Refer to the operation manual for setting of the switches.

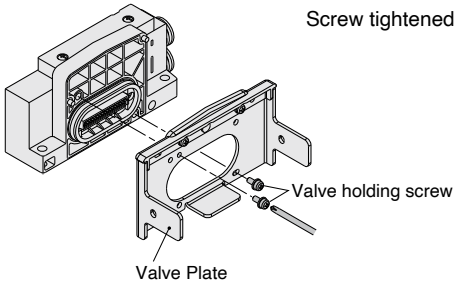

3. For the details of programming and address setting, refer to the manual from the PLC manufacturer.
The content of programming related to protocol is designed by the manufacturer of the PLC used.

<Handheld Terminal>

4. Do not press the setting buttons with a sharp pointed object.
This may cause damage or malfunction.

5. Do not apply excessive load and impact to the setting buttons.
This may cause damage, equipment failure or malfunction.

When the order does not include the SI Unit, the Valve Plate to connect the manifold and SI Unit is not mounted. Use attached valve fixing screws and mount the Valve Plate.
(Tightening torque: 0.6 to 0.7 N·m)

Maintenance

⚠Warning

1. Do not disassemble, modify (including circuit board replacement) or repair this product.
Such actions are likely to cause injuries or breakage.

2. When an inspection is performed,
- **Turn off the power supply.**
- **Stop the air supply, exhaust the residual pressure in piping and verify that the air is released before performing maintenance work.**

Unexpected malfunction of system components and injury can result.

⚠Caution

1. When handling and replacing the unit:
- **Do not touch the sharp metal parts of the connector or plug.**
- **Do not apply excessive force to the unit when disassembling.**

The connecting portions of the unit are firmly joined with seals.
- **When joining units, take care not to get fingers caught between units.**

Injury can result.

2. Perform periodic inspection.
Unexpected malfunction in the system composition devices is likely to occur due to malfunction of machinery or equipment.

3. After maintenance, make sure to perform an appropriate functionality inspection.
In cases of abnormality such as faulty operation, stop operation. Unexpected malfunction in the system composition devices is likely to occur.

4. Do not use benzene and thinner for cleaning units.
Damage to the surface or erasure of the display can result. Wipe off any stains with a soft cloth. If the stain is persistent, wipe off with a cloth soaked in a dilute solution of neutral detergent and wrung out tightly, and then finish with a dry cloth.

Other

⚠Caution

1. Refer to the catalogue of each series for Common Precautions and Specific Product Precautions on manifold solenoid valves.

⚠ Safety Instructions

These safety instructions are intended to prevent hazardous situations and/or equipment damage. These instructions indicate the level of potential hazard with the labels of **"Caution," "Warning"** or **"Danger."** They are all important notes for safety and must be followed in addition to International Standards (ISO/IEC) [1], and other safety regulations.

⚠ **Danger:**	**Danger** indicates a hazard with a high level of risk which, if not avoided, will result in death or serious injury.
⚠ **Warning:**	**Warning** indicates a hazard with a medium level of risk which, if not avoided, could result in death or serious injury.
⚠ **Caution:**	**Caution** indicates a hazard with a low level of risk which, if not avoided, could result in minor or moderate injury.

1) ISO 4414: Pneumatic fluid power – General rules and safety requirements for systems and their components.
ISO 4413: Hydraulic fluid power – General rules and safety requirements for systems and their components.
IEC 60204-1: Safety of machinery – Electrical equipment of machines. (Part 1: General requirements)
ISO 10218-1: Robots and robotic devices - Safety requirements for industrial robots - Part 1: Robots.
etc.

⚠ Warning

1. The compatibility of the product is the responsibility of the person who designs the equipment or decides its specifications.
Since the product specified here is used under various operating conditions, its compatibility with specific equipment must be decided by the person who designs the equipment or decides its specifications based on necessary analysis and test results. The expected performance and safety assurance of the equipment will be the responsibility of the person who has determined its compatibility with the product. This person should also continuously review all specifications of the product referring to its latest catalogue information, with a view to giving due consideration to any possibility of equipment failure when configuring the equipment.

2. Only personnel with appropriate training should operate machinery and equipment.
The product specified here may become unsafe if handled incorrectly. The assembly, operation and maintenance of machines or equipment including our products must be performed by an operator who is appropriately trained and experienced.

3. Do not service or attempt to remove product and machinery/ equipment until safety is confirmed.
1. The inspection and maintenance of machinery/equipment should only be performed after measures to prevent falling or runaway of the driven objects have been confirmed.
2. When the product is to be removed, confirm that the safety measures as mentioned above are implemented and the power from any appropriate source is cut, and read and understand the specific product precautions of all relevant products carefully.
3. Before machinery/equipment is restarted, take measures to prevent unexpected operation and malfunction.

4. Our products cannot be used beyond their specifications.
Our products are not developed, designed, and manufactured to be used under the following conditions or environments.
Use under such conditions or environments is not covered.
1. Conditions and environments outside of the given specifications, or use outdoors or in a place exposed to direct sunlight.
2. Use for nuclear power, railways, aviation, space equipment, ships, vehicles, military application, equipment affecting human life, body, and property, fuel equipment, entertainment equipment, emergency shut-off circuits, press clutches, brake circuits, safety equipment, etc., and use for applications that do not conform to standard specifications such as catalogues and operation manuals.
3. Use for interlock circuits, except for use with double interlock such as installing a mechanical protection function in case of failure. Please periodically inspect the product to confirm that the product is operating properly.

⚠ Caution

We develop, design, and manufacture our products to be used for automatic control equipment, and provide them for peaceful use in manufacturing industries.
Use in non-manufacturing industries is not covered.
Products we manufacture and sell cannot be used for the purpose of transactions or certification specified in the Measurement Act.
The new Measurement Act prohibits use of any unit other than SI units in Japan.

Limited warranty and Disclaimer/Compliance Requirements

The product used is subject to the following "Limited warranty and Disclaimer" and "Compliance Requirements".Read and accept them before using the product.

Limited warranty and Disclaimer

1. The warranty period of the product is 1 year in service or 1.5 years after the product is delivered, whichever is first. [2] Also, the product may have specified durability, running distance or replacement parts. Please consult your nearest sales branch.
2. For any failure or damage reported within the warranty period which is clearly our responsibility, a replacement product or necessary parts will be provided. This limited warranty applies only to our product independently, and not to any other damage incurred due to the failure of the product.
3. Prior to using SMC products, please read and understand the warranty terms and disclaimers noted in the specified catalogue for the particular products.

2) Vacuum pads are excluded from this 1 year warranty.
A vacuum pad is a consumable part, so it is warranted for a year after it is delivered. Also, even within the warranty period, the wear of a product due to the use of the vacuum pad or failure due to the deterioration of rubber material are not covered by the limited warranty.

Compliance Requirements

1. The use of SMC products with production equipment for the manufacture of weapons of mass destruction (WMD) or any other weapon is strictly prohibited.
2. The exports of SMC products or technology from one country to another are governed by the relevant security laws and regulations of the countries involved in the transaction. Prior to the shipment of a SMC product to another country, assure that all local rules governing that export are known and followed.
